ANN ARBOR INTRODUCES THE XL SERIES:

A DISPLAY OF EXCELLENCE IN FORM & FUNCTION

Product excellence doesn't happen overnight. At Ann Arbor we've been designing quality terminals for professionals for over 15 years. We've innovated many of the time- and eye-saving features you now take for granted. And many you don't, if you're not already an Ann Arbor user. Now we're unveiling another masterpiece: Our XL Series of ANSI-Standard Terminals.

Designed with you in mind.
The real beauty of the XL Series is its focus on your comfort. Its fully programmable keyboard saves you typing time and effort. Its dynamically selectable display lets you zoom more data onto the screen when you want more context, and less data when you just want bigger characters. With 15-inch or 17-inch portrait or landscape screens, offered in a full spectrum of phosphors, Ann Arbor is easy on your eyes.

Within the XL Series you'll find displays up to 170 characters per line and up to 66 lines per screen.

With plain English setup lines that give you a free hand in feature selection. And a whole palette of diagnostics and data-line monitoring aids to complete the picture.

There's an XL for every application.
Start with the Genie+Plus XL to meet your basic terminal needs. Move to the Ann Arbor Ambassador XL when you want a full-page display. When words alone no longer tell the story, switch to the GXL and add vector graphics. Finally, when you need even more memory and display than any other terminal provides, move all the way to the Guru® XL.

Take a closer look.
Study the specs. View the ergonomic design. See for yourself what it is that makes the Ann Arbor XL Series the state-of-the-art display terminal you've been looking for.
