Software

TO ALL RECIPIENTS OF THE PRICE BOOK:
PLEASE READ THIS IMPORTANT ANNOUNCEMENT

THE U.S. SOFTWARE PRICE LIST IS PUBLISHED PERIODICALLY AS A REFERENCE GUIDE FOR USE BY DIGITAL EQUIPMENT CORPORATION PERSONNEL AND DIGITAL'S CUSTOMERS. PRICES ARE ACCURATE AS OF THE DATE PRINTED ON THE COVER.

THE INFORMATION IN THIS DOCUMENT IS SUBJECT TO CHANGE WITHOUT ADVANCE NOTICE AND SHOULD NOT BE CONSTRUED AS A COMMITMENT BY DIGITAL EQUIPMENT CORPORATION.

DIGITAL ASSUMES NO RESPONSIBILITY FOR ANY ERRORS THAT MAY APPEAR IN THIS PRICE LIST.

FOR VERIFICATION OF THE CURRENT PRICES AND TO OBTAIN QUOTE INFORMATION, CONTACT YOUR LOCAL SALES REPRESENTATIVE OR ACCESS AN ELECTRONIC SYSTEM. FOR INFORMATION REGARDING ACCESS TO AN ELECTRONIC SYSTEM, CONTACT YOUR LOCAL SALES REPRESENTATIVE.

U.S. SOFTWARE PRICE LIST

Q4 FY'95 HIGHLIGHTS

April 3, 1995

⬛➡ **New Oracle Rdb Product Set** - See *Oracle* in the Index by Product Name

(Also see $VTX IR Category SP for additional product information)

⬛➡ A Listing of **Software Documentation** can be found at the end of each Layered Product section.

⬛➡ **System Class Quick Reference Chart** is located on the last page.

⬛➡ For Easy Product Lookup, Utilize the **Index by UPI** and the **Index by Product Name** located at the back of the book.

YOUR FEEDBACK IS IMPORTANT TO US

PLEASE USE THE COMMENT CARD PROVIDED ON BACK COVER

U.S. SOFTWARE PRICE LIST
TABLE OF CONTENTS

INTRODUCTION

WHAT'S NEW?

The new Oracle Rdb product set is included in the layered product sections. To assist in locating the products, look under 'Oracle' in the Index by Product Name. For additional information on the Oracle products being resold by Digital, reference the VTX information Repository (VTX IR) under the 'SP' Category.

HOW ARE THE SECTIONS ARRANGED?

The book is divided into Operating System sections. The Operating System sections are then broken out further into hardware platform sub-sections. For example, The OpenVMS section contains an OpenVMS AXP sub-section and OpenVMS VAX subsection.

The majority of sections contain model number and pricing information in Operating System charts, a Layered Software Product section sorted alphabetically by product name, and a Software Documentation Kit section also sorted alphabetically by product name.

For a complete listing of the sections and their corresponding sub-sections refer to the Table of Contents.

HOW DO I USE IT?

Once you've identified the Operating System (OpenVMS, DEC OSF/1, ULTRIX etc.) and the Hardware Platform (VAX, Alpha, RISC, etc.) your using, you then need to decide what type of software model number and pricing information you are looking for; Operating System information, Software Layered Product information; or Software Documentation kit information.

The Operating System charts' model numbers and prices are sorted by and listed next to the CPU (Central Processing Unit) model names they correspond to (i.e. DEC 7000, DEC 10000, etc.). The CPU model names are in alphanumeric order.

The Software Layered Product sections are organized alphabetically by a product's name. The word DEC, Digital, VAX and VMS at the beginning of a product name has been eliminated for easier product lookup. Many of the products in the PRODUCT NAME index are referenced by the full SPD name as well as a more commonly used product name. If you're not sure of a product's exact name, utilize the INDEX BY PRODUCT NAME or the INDEX BY PRODUCT UPI found in the back of the book.

Software Documentation Kit information can be found at the end of each layered product section. These sections are organized alphabetically by product name, just as the layered product section are. If you're not sure of a product's exact name, utilize the INDEX BY PRODUCT NAME or the INDEX BY PRODUCT UPI found in the back of the book.

HOW CAN I COMMENT ON THE BOOK?

All readers are encouraged to comment. A COMMENT CARD can be found on the back of this book. Internal Users: If you would prefer to comment on-line, you can send your comments to CASPRO::LMARINO.

Your comments and suggestions are very valuable. Many of the enhancements to this edition are the direct result of comments received from the field on previous editions. Your comments will assist us in our continuing effort to improve the quality and usefulness of this discount.

HOW CAN I BE ADDED TO DISTRIBUTION?

To be added to automated distribution for the U.S. Software Price List, Digital employees need to update their Readers Choice Profile in VTX ($VTX Profile). You may also order individual copies through VTX LOS (Literature Order System). For priority orders, shipment status, proofs of delivery, inventory status and general fulfillment item inquiry, call (800) 356-6696 External customers should fill out the reply card on back cover. Please reference the EE part number found on the back cover.

COMMONLY ASKED SOFTWARE QUESTIONS

QUESTION: HOW CAN THE PART NUMBER HELP ME DETERMINE WHAT TYPE OF LICENSE I HAVE?

Answer: There are many license types; the most popular are:

QL-UPIA*-AA This license type represents a traditional license where the * indicates the CPU/ID.

QL-UPIA9-AA This license type represents a traditional license that can be used on all processors. It is also the same price on all processors.

QL-UPIA9-J* This license type represents a ClusterWide license, which can be used on one or more VAX systems in a cluster based on "size". ClusterWide licenses are only available on OpenVMS VAX systems.

QA-UPIAA-H* This part number represents media kits containing media and documentation. * indicates media type; TK50 (5), CD (8), Magtape (M), Multimedia (W), PC Disk (C-RX23, 7-RX33, B-RX24, I-RX31)

QT-UPIA*-** This part number represents various types of services; LPS, MDDS, CDDS, SSS, SNS

QB-UPIA*-** This part number represents a package which includes the license, Media and Documentation.

QP-UPIA*-** This part number represents a package of licenses only.

QM-UPIA*-** Today this license type represents a PC-Style license.

QS-UPIA*-** This part number represents Digital consulting. See U.S. Systems/Services Price List, Digital Consulting section, for further definition and part number listing.

QUESTION: WHAT ARE THE DIFFERENT CD DISTRIBUTION PART NUMBERS?

Answer:

OpenVMS VAX:
QA-YL48A-H8 - Combined Media & On-Line Doc
QT-YL48A-C8 - CDDS Update Service

QA-VYR8A-G8 - Documentation Only On CD
QT-VYR8A-C8 - Documentation Only Updates

QA-VWJ8A-A8 - VMS Media Only
QT-VWJ8A-C8 - Update Service

OpenVMS AXP:
QA-MT1AA-H8 - Operating System Media & Docs CD
QT-MT1AA-E8 - CDDS for Operating System & Docs

QA-03XAA-H8 - Layered Products Media & Docs CD
QT-03XAA-C8 - CDDS for Layered Products & Docs

ULTRIX VAX/RISC:
QA-XLV8A-H8 - Combined Media & On-Line Doc
QT-XLV8A-C8 - CDDS Update Service

QA-GEW8A-G8 - Documentation Only On CD
QT-GEW8A-C8 - Documentation Only Updates

QA-XLU8A-H8 - ULTRIX Media Only
QT-XLU8A-C8 - Update Service

DEC OSF/1 AXP:
QA-MT4AA-H8 - Operating System Media & Docs CD
QT-MT1AA-E8 - CDDS for Operating System & Docs

QA-054AA-H8 - Layered Products Media & Docs CD
QT-054AA-C8 - CDDS for Layered Products & Docs

QUESTION: DO I NEED LPS WHEN QUOTING SERVICES?

Answer: If the System is under warranty, Quote MDDS/CDDS. LPS is not needed. (An exception is 2100 System)
If System is not under Warranty, must quote SSS/SNS, LPS & MDDS/CDDS.
For OpenVMS System, must quote SSS/SNS for Operating System and LPS for the System Users

QUESTION: HOW DO I REFERENCE CURRENT VERSIONS OF SOFTWARE?

Answer: VTX ESSB has all the CD Listings with UPI and Current Shipping Versions.

QUESTION: HOW DO I UPDATE MY CUSTOMER TO THE MOST CURRENT VERSION?

Answer: Order an Update License for the Product along with a New Media Kit. NOTE: Update Licenses are invoice only.

QUESTION: HOW DO I FIND CORRECT PRODUCT NAMES IN THE PRICEBOOK

Answer: Use the Indexes located at the back of the Book. There is an Index by UPI and one by Product Name.

In the Product Name Index, most Products are listed by their more common names, without the word DEC, Digital, VAX or VMS. The word DEC and VAX have been kept with some products; such as DECnet, DECpage and VAXcluster, where DEC and VAX are part of the common name. POLYCENTER products are listed in the Product Name Index with and without the word POLYCENTER. Product names are also cross referenced, listing the legal names or other commonly used names for the product.

QUICK PHONE INDEX

ORGANIZATION	TELEPHONE	DESCRIPTION
CARRY-IN SERVICenter	800-225-5385	Provides contract or per call carry-in service, and over the counter swap service for selected parts. 8:15 A.M. - 5:00 P.M., ET, Mon-Fri in most locations.
CORPORATE CUSTOMER RELATIONS	800-DEC-INFO (800-332-4636)	Chartered to handle customer inquires, sales/service contact information and critical issues. 8:15 A.M. - 5:00 P.M., ET, Mon-Fri
CUSTOMER RETURN CENTER	800-225-5385	Mail in parts replacement service for over 2,000 repairable parts; 24 hour emergency service available for qualified customers. 8:15 A.M. - 5:00 P.M., ET, Mon-Fri
CUSTOMER SUPPORT CENTER	800-354-9000 800-654-1232 404-343-1827 or 719-592-5138	Hardware or software support. 24 hours, 7 days/week Desktop Services. 12 hours, 5 days/week. For general CSC information, or for information regarding the CSC customer visit program.
DECUS	800-332-8755	Digital Equipment Computer Users Society.
DECdirect	800-DIGITAL (800-344-4825)	Digital's telephone ordering and information service. 8:30 A.M. - 8:00 P.M., ET, Mon-Fri
DESKTOP DIRECT	800-PCBYDEC (800-722-9332)	Provides technical support, pricing and ordering information, 8:30 A.M. - 5:00 P.M., ET, Mon-Fri
DIGITAL FINANCIAL SERVICES	800-343-3451	Provides information on a variety of financing alternatives for U.S. customers 8:00 A.M. - 5:00 P.M. ET, Mon-Fri
DIGITAL PRESS	800-344-4825	Internal publisher of books and journals for computer professionals. 8:30 A.M. - 5:00 P.M., ET, Mon-Fri
DIGITAL REFERENCE SERVICE (DRS)	508-467-4566	Customer support inquires for DRS customers. 8:00 A.M. - 5:00 P.M., ET, Mon-Fri
DIRECTORY ASSISTANCE	508-493-5111	General Digital phone directory.
EDUCATION AND TRAINING	800-332-5656	Supports Digital's hardware, software, and CENTER networking products. Offers pre-sales information and consulting services; provides trouble shooting assistance 8:15 A.M. - 6:00 P.M., ET, Mon-Fri

* Support for Digital Sales Personnel - needs area region information.

ORGANIZATION	TELEPHONE	DESCRIPTION
ELECTRONIC CONNECTION	800-234-1998 By modem (1200/2400 baud)	Digital's on-line product information, quoting, and ordering service. 7:00 A.M. - midnight, ET, 7days/week
EIC SALES SUPPORT CENTER	800-832-6277 603-884-8990	Supports current and prospective EIS/CSS customers with configuration, pricing, and application help.
PART NUMBER ASSISTANCE	603-884-5000	Provides general part number assistance, as well as, service for unlisted parts, 8:30 A.M. - 5:00 P.M., ET, Mon-Fri
TECHNICAL CONSULTING CENTER (TCC)	800-344-4825	Provides pre-purchase technical assistance. 8:30 A.M. - 6:00 P.M., ET, Mon-Fri

  - Platform Abbreviation Chart

EXPLANATION OF TERMS USED

Generally, model number and price information for a software product is presented with the license, corresponding software product services and media and documentation kits.

Though nearly all the information is self explanatory, several terms have been defined as follows:

Concurrent Use License: Concurrent Use Licenses provide the customer with the right to use a specific layered product within a single Software Management Domain provided that the number of simultaneous uses does not exceed the number of licenses allocated to the single Software Management Domain. For the purposes of the Concurrent Use License, the term "user" shall mean any activity or use specified in the applicable SPD.

Documentation Service: A subscription Service that provides an additional copy of any new or revised documentation delivered as part of an SPS service offering. It is purchased on a per-product basis.

Electronic Documentation: Unless otherwise specified Customer may print electronic Software documentation as reasonably necessary to its right to use Software.

HelpDesk Support: Available for customers whose in-house technical staff provide direct support to their end-users, but who require backup support for a wide range of PC Software. HelpDesk Support coordinates support from multiple vendors and delivers a single comprehensive solution to the customer's "HelpDesk".

Installation Service: As part of the Installation Service for Software, Digital will:

o Review the Software Installation Guide with a representative of the Customer.
o Verify that all documentation and media are present.
o Install the software and perform a system generation where applicable.
o Set up a user account and a user directly if applicable. (Per the MIS Manager)
o Create a backup copy of the software installed.
o Provide listings of system generation dialog when a hardcopy terminal is available.

Layered Product Support: Layered Product Support provides the right-to-use new versions of layered software products, and is required for all Digital layered software running on a system covered by either Full Support or Node Service. When Layered Product Support is purchased for software products on a system covered by Full Support, telephone assistance will be provided by the Full Support service offering through the three authorized contacts to include the layered product.

Layered Product Support for most products is quoted in units according to the license rating of the system on which each layered product is running and is applicable to both clustered and nonclustered systems. Also available Layered Product Support for Concurrent and Personnel-Use License.

License Rating: Each VAX processor has been assigned a License Rating. See the VAX License Rating Table on the last page of this publication.

License Transfer: Customer may not transfer a license to another party except with Digital's written permission.

List (Price): The current U.S. Price which includes conformance to the Software Product Description.

Media: The physical media on which the software code resides.

Media & Documentation Distribution: DIGITAL will provide:

o New software releases and interim updates made generally available on designated media.
o Improvements and enhancements to software reference manuals made generally available.

New Version License Service: Grants the PC user the right-to-use all new versions of a particular PC software product released during the contract period.

Packaged License & Kit: A Software license, media and documentation kit packaged together under one model number.

PC License Agreement: A Special license agreement which governs the use of PC software. The PC License Agreement is the "Proof of License" for software used with a PC. The PC License/Agreement comes bundled with the PC Software Media as a package.

PC-style License: A special license which grants a user the right to use PC software. The use of the PC-style license is governed by the respective PC License Agreement.

Personal Use License: Each Personal Use License provides a single user with the right to multiple simultaneous Use of a specific layered product within a single Software Management Domain. For the purpose of a Personal Use License, a "user" is defined as a specified individual to whom a Personal Use License has been assigned. Records must be kept of the identities of the specific individuals to whom Personal Use Licenses have been assigned as well as the dates that such assignments are made and are to be made available to Digital on request.

Processor Tier: The processors are grouped by common license ratings presented as processor tiers for each hardware platform. For processor tier assignments, see the Model Number Configuration charts in the preface section of this publication.

Product Names: The name which appears for each product is the formal product name found in the Software Product Description (SPD). An index of software product names are cross-referenced by many of their common variations.

Shrinkwrap Software: Shrinkwrap Software is subject only to the license terms provided with the Software.

Software Discount Codes: Discount codes are designated to software products according to either End User ("EU") or Business Partner ("BP") relationship type. Each part number in this Price List has an assigned discount code for EU's and BP's. Software discount codes for End User's are either "Y" or "H" and for Business Partners should refer to their applicable U.S. Price List Supplement for Business Partners for specific pricing and discount information.

Software Support Service: Software Support Service provides comprehensive support for the kernal software, which may include: OpenVMS, OpenVMS AXP, DEC OSF/1 AXP, ULTRIX DECnet, VAXcluster software, and Workstations software. DECserver and network interconnect software, and selected non-Digital software are applicable.

o Telephone support from the Customer Support Center.
o Access to the Digital Software Information Network.
o Right-to-use new version of kernal software.
o Critical on-site support for the kernal software.

NOTE: When Layered Product Support is purchased, any Full Support Service; such as Software Support Service, provides coverage of the layered products for the service attributes provided on the kernal operating system

Software Node Service: Software Node Service is designed for customer whose in-house staff provides primary support to their end-user. Software Node Service includes:

o Right-to-use new version of kernal software.

Software System Management Service: Software System Management Service is a system level service purchased in conjunction with System Support Service, which provides enhanced level of support via a specialized team at the Customer Support Center.

A Software Specialist from the software System Management Service Team will be assigned to coordinate the delivery of:

o Pro-active Customer Support
o Problem Management
o System Healthcheck

Prerequisites: DECsystem Support Service, Basic System Support Service, "or" Software Support Service for the Operating System or Integrated Warranty.

Software Update Installation Service: Software Update Installation Service is designed for customers that need the expertise and knowledge of Digital resources to understand the impact and dynamics, and to supplement their "in-house" capability when major software changes are released. A specialist at the Customer Support Center will help the Customer plan for the installation of software updates on the system and then perform the installation of these updates on the customer's system to minimize disruption in the customer's operation.

Software Update Installation Service includes:
o Installation of software updates.
o New version impact planning and analysis.

Prerequisite: DECsystem Support Service, Basic System Support, or Integrated Warranty.

Software Volume Pricing: Software Volume Pricing is the ability to receive a price based on the quantity of licenses purchased. Please reference Software Volume Pricing Curve Chart, located in preface, to see range of pricing available and ordering procedures.

SPD (Software Product Description)	The SPD is the official defining document for software licensed products licensed by Digital Equipment Corporation, including Digital licensed third party products. The SPD describes all important functional characteristics of the software, terms & conditions, software products system environment and identifies required & optional hardware & software.
Standard (Price):	This price includes Standard Warranty support as described in the warranty matrix section of the U.S. Systems/Services Price List.
Startup Service Package Level III:	Level III provides: o INITIAL MEDIA & DOCUMENTATION for the operating system and all eligible dependent Digital software products. o INITIAL SOFTWARE INSTALLATION for the operating system and all eligible dependent Digital software products. o DECstart PLUS. o EDUCATIONAL TRAINING. o One year MEDIA & DOCUMENTATION DISTRIBUTION SERVICE for the operating system and all eligible dependent Digital software products. o One year SOFTWARE SYSTEM MANAGEMENT SERVICE for the operating system and all eligible dependent Digital software products. o One year SOFTWARE UPDATE INSTALLATION.
Startup Service Package Level II:	Level II provides: o INITIAL MEDIA & DOCUMENTATION for the operating system and all eligible dependent Digital software products. o INITIAL SOFTWARE INSTALLATION for the operating system and all eligible dependent Digital software products. o DECstart PLUS. o EDUCATIONAL TRAINING. o One year MEDIA & DOCUMENTATION DISTRIBUTION SERVICE for the operating system and all eligible dependent Digital software products. o One year SOFTWARE SYSTEM MANAGEMENT SERVICE for the operating system and all·eligible dependent Digital software products.
Startup Service Package Level I:	Level I provides: o INITIAL MEDIA & DOCUMENTATION for the operating system and all eligible dependent Digital software products. o INITIAL SOFTWARE INSTALLATION for the operating system and all eligible dependent Digital software products. o DECstart PLUS. o EDUCATIONAL TRAINING. o One year MEDIA & DOCUMENTATION DISTRIBUTION SERVICE for the operating system and all eligible dependent Digital software products.
Traditional License:	A type of software license that provides a customer with the right to use a software product on a designed single processor. It is issued in conjunction with use of the binary code. Traditional Licenses can be flat priced or priced by system class.
Update License:	An Update license permits the use of the current version of the Software in accordance with the terms of the underlying (non-update) license type in effect at the time the Update License is granted. An underlying (non-update) license is a prerequisite.
UPI:	The Unique Product Identifier is composed of three alphanumeric characters.
Versions of Software:	A license for the current version of software is granted at the time of acceptance of an order for a license or for Equipment or Service which includes a license.
User Application Support:	Provides end-user with direct access to Digital Software Specialists, and is designed for customers who either do not have an internal support staff for PC applications, or whose internal staff chooses not to directly support a particular platform or set of applications.

SOFTWARE LICENSE DESCRIPTIONS ("SLDs")

The following is the complete set of Digital's SLDs. The model number referenced is on the front of the license deliverable. Additional terms may be included in the Software Product Description (SPD) or user documentation accompanying the Software.

TRADITIONAL LICENSE (model number QL-*****-AA)

A Traditional license for layered Software permits use of the Software on one specified hardware/operating system at a time. The License Management Facility (LMF) "INCLUDE" option may be used to identify the single licensed system. "Digital System Chart" details the permitted hardware systems.

TRADITIONAL LICENSE (model number QL-001**-A*)

A Traditional License OpenVMS permits use of the Software on one specified system.

CONCURRENT USE LICENSE (model number QL-*****-3*)

A Concurrent Use License permits a single execution or access of the Software at a time on one system or VAXcluster/VMScluster configuration at a time, and on a specified operating system.

PERSONAL USE LICENSE (model number QL-*****-2*)

A Personal Use License permits use of the Software by one assigned person on one system or VAXcluster/VMScluster configuration at a time, and on a specified operating system. 30 day minimum license assignments are required, unless for system management.

OPERATING SYSTEM BASE LICENSE (model number QL-*****-6*)

An Operating System Base License permits batch, print, and file services as well as non-interactive display of information on a specified system. When both the Base and SMP Extensions to the Base are offered, the Base license is required for the system's first processor, and the SMP Extension for each additional processor.

INDIVIDUAL INTERACTIVE USER LICENSE (model number QL-XUL**-B or QL-MT2**-B*)

An Individual Interactive User License permits use of the Software by a specified number of users at a time on a single system at a time. A user, either a person or a device, is one that uses the software interactively under a single session.

DISTRIBUTED INTERACTIVE USER LICENSE (model number QL-09S**-B*, QL-MT3**-B*, or QL-MT7**-B*)

A Distributed Interactive User License permits use of the Software by a specified number of users at a time on a single system or VAXcluster configuration or VMScluster configuration at a time. A user, either a person or a device, is one that uses the software interactively under a single session.

OPERATING SYSTEM USER LICENSE (model number QL-*****-B*)

An Operating System User License, (unless listed under INTERACTIVE USER LICENSES) permits use of the Software by a specified or unlimited number of users on a single specified system. A user, either a person or a device, is one that uses the software interactively under a single session.

APPLICATION DEPLOYMENT LICENSE (ADL) (model number QL-*****-W*)

An Application Deployment License for OpenVMS permits use of the Software by a specified or unlimited number of users on a single specified system. A user, either a person or a device, is one that uses the software interactively under a single session. This license is restricted to use only with a Digital Business Partner's hardware and software applications. It may not be used for software development.

APPLICATION DEPLOYMENT USER LICENSE (ADUL) (model number QL-NBZ**-6*)
An Application Deployment User License for OpenVMS permits use of the Software by a specified or unlimited number of users on a MicroVAX 3100. A user, either a person or a device, is one that uses the software interactively under a single session. This license is restricted to use only with a Digital Business Partner's hardware and software applications. It may not be used for software development.

DEVELOPER LICENSE (model number QL-*****-K*)

A Developer License permits use of the Software for purposes of demonstration and development of hardware and software applications defined in the Demonstration/Development Program Guidelines. This license permits use of the Software only on the single workstation on which the Software is first used. This license is limited to 12 months from the time of the license grant, but permits use of any version of the Software which is released during the term of the license.

UPDATE LICENSE
An Update License extends the right of the underlying license to a subsequent version.

SOFTWARE LICENSE TRANSFER POLICY

Digital software products and licenses fall into one of three transfer categories:

Category 1. Operating systems and other products required for the operation of the system or device; these are relicensable products.

Category 2. Layered software, including middleware, compilers, tools, applications; these are redesignatable products.

Category 3. DECnet products listed on Digital's Standard Relicensable Software List (SRSL), VAXcluster Software, and the Interactive User Licenses for the operating system; theseare both relicensable and redesignatable products.

TRANSFER POLICIES BY CATEGORIES:

Category 1: Operating systems and other products required for the operation of the system or device.

Products in this category are Digital-licensed products listed on Digital's SRSL. Some products on the Digital's SRSL have additional rights as identified in category 3.

These products may be transferred to a new legal entity only with the transfer of the system on which the software was originally licensed. A system must be operational and have a minimum configuration which is capable of executing the software that is being relicensed.

SMP Extensions to the Operating System Base License may only be transferred with the corresponding Operating System Base License.

Each of these transfers require that Digital's relicense process be followed.

Category 2: Layered software, including middleware, compilers, tools, and applications.

Products in this category are Digital-licensed products that are not listed on Digital's SRSL.

These products may be transferred from one system to another within a given legal entity, providing the license is valid for the new system.

Traditional and ClusterWide Licenses may be transferred to any system of an equal or lower tier, system class, or rating within the same hardware and operating system platform. Moving to a higher tier, system class, or rating, or moving to a different hardware platform or different operating system will require the trade-in and upgrade of these licenses.

Concurrent or Personal Use Licenses may be transferred to any system with the same operating system.

These transfers are redesignations and require neither notification to Digital nor Digital's approval.

These products may also be transferred with or without hardware from one legal entity to another only within a Corporate Group. When this occurs Digital's relicense process must be followed. Transfers are not permitted between legal entities unless they are part of a Corporate Group.

Category 3: DECnet products listed on Digital's SRSL, VAXcluster Software, and the Interactive User Licenses for the operating system.

Relicense and redesignation may occur for the same license in any order for these products.

A. When the Relicense Process is Used:
   These products may be transferred to another legal entity within a Corporate Group with or without the transfer of a hardware system.
   When the transfer is to another legal entity NOT WITHIN a Corporate Group the license transfer requires the transfer of a hardware system that is operational and have a minimum configuration which is capable of executing the software that is being relicensed.

   Interactive User Licenses may be transferred either with or without the Operating System Base when the transfer is to another legal entity within the same Corporate Group. When transferred to another legal entity outside of the Corporate Group, they must be transferred with the Operating System Base License, which requires the transfer of the system on which the software was originally licensed.

   Each of these transfers require that Digital's relicense process be followed.

B. When the Redesignation Process is Used:

   These products may also be transferred from one system to another within a given legal entity, providing the license is valid for the new system. These transfers are redesignations and require neither notification to Digital nor Digital's approval.

Licenses Which May Not Be Transferred:

Digital does not permit the transfer of the following license offerings:
Campuswide Software License, Source License, Software Loan License, Application Deployment License for OpenVMS, Application Deployment User License for OpenVMS, Developer License, Periodic Payment License, and Field Test License. In addition, the transfer of an Update License may only be done with the underlying license according to the transfer rights of that underlying license.

When the Operating System Base License that corresponds to an Application Deployment User License is relicensed, each Application Deployment User License for OpenVMS is terminated.

Third Party and Shrinkwrap Licenses

These licenses are only transferable in accordance with the license terms of each software product.

RELICENSABLE SOFTWARE

The following Digital Operating Systems and other relicensable software.

OPERATING SYSTEMS

PRODUCT	UPI
COS-310	300, 310
COS-350	971
CP/M-86/80 Operating System	061
DECmate CP/M-80 Operating System	A25

SYSTEM SUPPORT SERVICES

System Support Services provide comprehensive hardware and software maintenance services for VAX systems, Alpha AXP systems, RISC DECsystems and DEC OSF/1 AXP systems. System Support Services are available in two levels of support: Full Support and Node Service.

FULL SUPPORT/NODE SERVICE

Full Support provides integrated hardware and software remedial support, telephone advisory support and the right-to-use new versions of kernel software. Full support ensures customers have direct access to Digital's Customer Support Centers.

For customers who don't require hardware support, software-only Full Support is available and provides software remedial support, telephone advisory support and the right-to-use new versions of kernel software.

Node Service provides remedial hardware support and the right-to-use new versions of kernel software. Node Service is designed for customers whose in-house staff provides primary support to their end users.

When Node Service is purchased in conjunction with Full Support, telephone support is extended through the three assigned contacts on the Full Support system to include support of the systems covered by Node Service. Full Support must be purchased on the largest system as defined by CPU power rating and all systems must be on the same service agreement.

For customers who don't require telephone support, Node Service may be purchased standalone, without Full Support.

Software Support Service and Software Node Service prices for operating systems can be found in the Software section of the U.S. Systems/ Services Price List. See Integrated System Support Services and Hardware and Software Maintenance Service Tables for the features of Full Support and Node Service.

NOTE: Full Support and Node Service are available for DECserver products and Network Interconnect products including Routers, Portals and Gateways.

LAYERED PRODUCT SUPPORT

Layered Product Support provides the right-to-use new versions of software products and is required for all Digital licensed, Digital supported software running on a system covered either by Standard Warranty, Full Support or Node Service. When Layered Product Support is purchased for software products on a system covered by Full Support, telephone assistance will be provided through the three authorized contacts to include the layered products.

The Layered Product Support service purchased must correspond to the license type purchased for each software product.

Layered Product Support prices are listed in this price list.

INTEGRATED SYSTEM SUPPORT SERVICES

| | FULL SUPPORT | | NODE SERVICE | |
| | DECsystem | Basic System Support | DECservice Node Service | Basic Node Service |
Features	Support (DSS) 1	(BSS)	(DNS) 1, 3	(BNS) 3
Telephone support from Customer Support Center 7 days a week, 24 hours a day	*	*

ADDITIONAL SOFTWARE PRODUCT SERVICES OPTIONS
DESCRIPTIONS

SOFTWARE UPDATE DISTRIBUTION SERVICES

Software Update Distribution Services provide customers with an automatic way of receiving software media and documentation updates. The choices include:

> Media and Documentation Distribution Services
> Documentation Update Service
> CDROM Distribution Services
> Alpha AXP Distribution Services

MEDIA AND DOCUMENTATION DISTRIBUTION SERVICES

Media and Documentation Distribution Service includes automatic distribution of software binaries and hardcopy documentation per software product each time a new version is released by Digital.

Beginning in September, 1993, existing MDDS customers will have two new options - scheduled software delivery and consolidated distribution. These new MDDS features will allow customers to better manage the shipment and installation of software updates.

Scheduled Software Delivery

Customers will now be able to schedule software delivery by selecting the months in which they would like to receive their software updates. They can choose to receive updates two, three, or four times per year in any combination of months. Software will be shipped during the third week of the selected months.

The delivery schedule for software updates is determined by system. All software products on a single system must have the same delivery schedule. However, agreements with multiple systems may contain a different delivery schedule for each system, as each CPU may have its own update timetable. Updates for any products on engineering hold will not be included in the scheduled delivery, but will be mailed separately to the customer once the product is taken off hold and released.

Consolidated Distribution

Customers selecting scheduled software delivery can also choose to have their software consolidated. Rather than shipping one large box with separate software binaries, the SSB will consolidate all eligible software binaries onto as few pieces of media as possible.

The media will include all of the software products (that have updated since the last scheduled delivery) in the correct order for installation, all related hardcopy documentation and a hard copy table of contents.

NOTE: For technical reasons, some products cannot be consolidated. These products will be shipped with consolidated media, but will be on separate pieces of media.

In addition, the following business rules apply to MDDS media consolidation.

1. Layered software products for OpenVMS VAX only.
2. The customer must have 2 or more layered products to be eligible.
3. Distribution on TK50 and 1600 BPI magnetic tape only.
4. All software line items on a single system must have the same delivery schedule.
5. All MDDS line items under each CPU must have the same quantity.
   Multiple quantities of the same line item should be moved onto other systems on the agreement. For example, if the customer is registered for 2 copies of Fortran MDDS, one copy should be moved onto the system where it will be used and the other copy will be included in the consolidation.
6. On multiple CPU agreements, media consolidation can be selected independently for each system.

Environmental Disposal

In a partnership between Software Product Services and the Property Disposition Center (PDC), Digital will offer media recycling for customers who elect media consolidation. Media consolidation customers will receive a preaddressed, prepaid envelope in which they can place their used pieces of consolidated media (TK50 and 1600 BPI magtape only) and return them to Digital. The universal recycling symbol will appear on these envelopes. The PDC will recycle the used media, as well as pieces of the plastic media housing, saving Digital raw material and disposal costs, while helping to reduce waste.

DOCUMENTATION UPDATE SERVICE

Documentation Update Service provides an additional set of hardcopy documentation as new versions are released by Digital. This is available on a per product basis for OpenVMS (VAX and AXP), ULTRIX/RISC and DEC OSF/1 AXP operating systems and associated layered products.

For operating system software part numbers, refer to the Operating System Section of the price list. For layered product part numbers, refer to the Layered Product Section of this price list.

CDROM DISTRIBUTION SERVICES

CDROM Consolidated Distribution Services are available for software binaries only, documentation only, or combined software binaries and documentation. Customers access those products for which they are licensed by using the appropriate License Product Authorization Key (PAK).

Consolidated Distribution Service (CONDIST)

Consolidated Distribution Service includes the software binaries for either the OpenVMS VAX or ULTRIX RISC operating systems and associated layered products on CDROM disks. The disks are distributed every two months. Customers have access to those products they are licensed for. Note: This service does not include documentation updates.

For a list of software binaries currently available on CONDIST, consult $VTX ESSB and reference the CDROM section. This list is also provided every 2 months in Sales Update.

Quote the part numbers and pricing listed below:

OpenVMS VAX CONDIST Service	QT-VWJ8A-C8	$188/month
ULTRIX/RISC CONDIST Service	QT-XLU8A-C8	$188/month

Online Documentation Library Subscription Service (OLD)

Online Documentation Library Subscription Service includes documentation for either the OpenVMS VAX, ULTRIX and RISC operating systems and associated layered products on CDROM disks. The disks are distributed every two months. Customers have access to the products for which they are licensed.

For a list of documentation currently available on OLD, consult $VTX ESSB and reference the CDROM section. This list is also provided every 2 months in Sales Update.

Quote the part numbers and pricing listed below:

OpenVMS VAX OLD Service	QT-VYR8A-C8	$188/month
ULTRIX/RISC OLD Service	QT-GEW8A-C8	$188/month

Consolidated Distribution and Documentation Service (CDDS)

Consolidated Distribution and Documentation Service includes software binaries and documentation for either the OpenVMS or ULTRIX/RISC operating system and associated layered products on CDROM disks. The disks are distributed every two months. Customers access those products for which they are licensed for by using the appropriate Product Authorization Key (PAK).

Quote the part numbers and pricing listed below:

OpenVMS VAX CDDS	QT-YL48A-C8	$333/month
ULTRIX/RISC CDDS	QT-XLV8A-C8	$333/month

ALPHA AXP DISTRIBUTION SERVICES

Media and documentation updates for Alpha AXP are available on CDROM only. There is a media and documentation distribution service available for the OpenVMS AXP and DEC OSF/1 AXP operating systems and a consolidated media and documentation distribution service available for the associated layered products.

Note: Some Alpha AXP operating system and layered products have hardcopy documentation update service available. Refer to the Operating System and Layered Product Sections of this price llist for individual part numbers.

Quote the part numbers and pricing listed below:

OpenVMS/AXP MDDS on CDROM	QT-MT1AA-E8	$40/month
DEC OSF/1 MDDS on CDROM	QT-MT4AA-E8	$35/month
OpenVMS AXP LP Consol. SVC	QT-03XAA-C8	$167/month
DEC OSF/1 AXP LP Consol SVC	QT-054AA-C8	$167/month

ADDITIONAL CUSTOMER SUPPORT CENTER CONTACT

Additional Customer Support Center Contact allow customers to register additional members of their staff as contacts for electronic and telephone support through the Customer Support Centers. This service supplements the three Customer Support Center contacts included with System Support Service. This service is ordered by operating system and includes all the layered products running on the system. The prerequisite for this service is full telephone support (provided with DECsystem Support, Basic System Support, Software Support Service, or an equivalent level of Standard Warranty).

Ordering information:

OpenVMS VAX	QT-001A9-6Z	$200/month/each contact
ULTRIX	QT-upiA9-6Z	$200/month/each contact
OpenVMS AXP	QT-MT1A9-6Z	$200/month/each contact
DEC OSF/1 AXP	QT-MT4A9-6Z	$200/month/each contact

SOFTWARE UPDATE INSTALLATION SERVICE

Software Update Installation Service provides remote installation of major updates for the operating system software and the Digital supported layered software products licensed on the system and will assist customers in major version update planning.

SOFTWARE SYSTEM MANAGEMENT SERVICE

Software System Management Service enhances the level of software support provided through standard full support contract or warranty offerings. As an overlay to the remedial support provided by these standard offerings, Software System Management Service provides an Assigned Software System Management Specialist at the CSC to act as the point of contact for critical software problem management and proactive software maintenance support. Non-critical software problems will be handled through the standard support teams.

The Software System Management Service Team is available Monday through Friday (excluding Digital observed holidays), 8:00 a.m. to 8:00 p.m. Eastern Standard Time.

The prerequisite for Software System Management Service is a full support contract - DECsystem Support, BASIC System Support, Software Support Service, or equivalent level of warranty. These services will provide customers with the standard telephone support and electronic access to the CSC 24 hours per day, 7 days per week.

Software System Management Service is purchased for each system covered by Software Support Service contract in the environment. It is available for OpenVMS VAX and AXP, OSF/1, VAX ULTRIX and RISC ULTRIX systems. VAX System V and SCO Unix are not available.

The model number format is: QT-UPIA*-P9. The UPI identifies the operating system and The * identifies the processor tier.

MISSION CRITICAL SUPPORT SERVICE

Mission Critical Support Services is an added value enhancement to Digital's standard Software Product Services and Hardware Product Services. It increases responsiveness and expedites problem resolution by routing critical service requests to the appropriate expert level resources, 24 hours a day, 7 days a week.

Digital will provide a high level technical Named Account Management Specialist, who as part of the Account Team, acts as the single point of contact for critical hardware and software problems. The Named Account Management Specialist is familiar with the customer's environment and configuration and monitors critical hardware and software request activity. In addition, all Mission Critical Support Services requests are given the highest priority and critical calls are routed directly to the Named Account Management Specialist for a 15 minute guaranteed call back. Non-critical service requests are routed to the Customer Support Center standard support teams and given the highest queue priority with a 30 minute guarantee call back.

The customer also receives a quarterly technical newsletter, upgrade impact planning and pro-active distribution of patches. Mission Critical Support Service is available on OpenVMS VAX and AXP systems, DEC OSF/1/AXP, VAX/ULTRIX and RISC/ULTRIX Systems. VAX System V and SCO Unix are not eligible.

QUOTING EXAMPLES:

STANDALONE SYSTEM

For a standalone agreement, the Anchor System Support is purchased in addition to the prerequisites of: Software Support Service and Layered Product Support for all Digital layered software products on the system, and DECservice 24 x 7 for hardware uplifted to 2 or 4 hours response. The equivalent level of integrated service or level of warranty also meets the above service requirements.

QR-SMMCA-YA	MISSION-CRITICAL ANCHOR CHARGE	$2,941/MO	TOTAL $2,941/MO

1.17

CLUSTERED SYSTEM (4 NODE)

For a clustered system agreement, Anchor System support is purchased for the highest rated processor in the cluster. The Node System support is purchased for each additional Node on the agreement. The prerequisites are: Software Support Service on the highest rated processor in the cluster (Anchor), Software Node Service for each Node 2-N, Layered Product Support for all Digital software layered products on the Cluster, and DECservice 24 x 7 for hardware uplifted to 2 or 4 hours response. The equivalent level or integrated service or level of warranty also meets the above service requirements.

QR-SMMCA-YA	MISSION CRITICAL ANCHOR CHARGE	$2,941/MO
QR-SMMCN-YA	MISSION CRITICAL NODE CHARGE	$ 196/MO
QR-SMMCN-YA	MISSION CRITICAL NODE CHARGE	$ 196/MO
QR-SMMCN-YA	MISSION CRITICAL NODE CHARGE	$ 196/MO

TOTAL $3,529/MO

RESPONSE MANAGEMENT SERVICE

Response Management Service extends hardware and software problem management beyond what is provided through Digital's standard full support contracts or warranty. Response Management Service provides a single point of contact for logging hardware and software service requests, a designated Technical Support Specialist who becomes familiar with the customer's environment, monitors ongoing hardware as well as software service request activity and conducts monthly reviews of service calls. Responses to calls are guaranteed within one hour. A quarterly technical newsletter and information about newly released patches and updates are provided.

Response Management Service is available Monday through Friday 8:00 AM to 8:00 PM, Eastern Standard Time. After the standard hours of operation, all calls will be routed to standard product support teams for timely resolution.

Response Management Service is available for OpenVMS VAX, and AXP systems, DEC OSF/1/AXP VAX/ULTRIX and RISC/ULTRIX systems. VAX System V and SCO UNIX are not eligible.

QUOTING EXAMPLES:

STANDALONE SYSTEM

For a standalone system agreement, the Anchor System support is purchased in addition to the prerequisites of: Software Support Service, Layered Product Support Service for all Digital supported layered software products on the system, and DECservice for hardware. The equivalent level of integrated service or level of warranty also meets the above servicerequirements.

QR-SMRMA-YA	ANCHOR SYSTEM CHARGE	$940/MO	TOTAL $940/MO

CLUSTERED SYSTEM (4 NODE)

For a clustered system agreement, Anchor System Support is purchased for the highest rated processor in the cluster. The Node System support is purchased for each additional Node on the agreement. The prerequisites are: Software Support Service on the highest rated processor in the cluster (Anchor), Software Node Service for each Node 2-N, Layered Product Sup port for all Digital software layered products on the cluster, and DECservice for hardware. The equivalent level of integrated service or of warranty also meets the above service requirements.

QR-SMRMA-YA	ANCHOR SYSTEM CHARGE	$ 940/MO
QR-SMRMN-YA	NODE SYSTEM CHARGE	$ 94/MO
QR-SMRMN-YA	NODE SYSTEM CHARGE	$ 94/MO
QR-SMRMN-YA	NODE SYSTEM CHARGE	$ 94/MO

TOTAL $1,222/MO

DEVELOPER SUPPORT

Developer Support is a service designed for corporate developers and independent software vendors development group personnel. It provides expert technical support for a wide range of software development environments. Developers receive expert-level technical support for development-related questions concerning:

> Advanced programming related product features
> Design specifications
> Programming in client/server environments
> Product internals
> Development standards

Options include:

1. Electronic Developer's Forum Membership   QR-SMEFW-AA $2,004/Year
   -Access to electronic conferencing facility
   (monitoring by Digital's Developer Support Team)
   -Subscription to hardcopy Developer's Newsletter
   -Startup Package explaining registration & features

2. Direct Access to Developer Support Team
   -Unlimited access by telephone, fax or electronic mail during local business hours (8am to 5pm).
   -Access for up to five customers contacts
   -Consolidated Service Report
   -Provides continuous support for critical problems reported during customer's coverage hours

   -Available as contract or Solution Packs:

QR-SMDAD-AA	Access for one year	$21,480/year
QR-SMDAD-AB	Access for 6 months	11,040/year
QR-SMDAD-AC	Five Solution Pack	1,000
QR-SMDAD-BA	One Solution Pack	250

3. Named Account Representative (Assigned Team Leader)
   -Available to customers who have purchased Direct Access contract (above)
   -Collects and maintains customer information
   -Tracts problem histories

QR-SMACR-AA	Named Acct Rep/one yr	$5,040/year
QR-SMACR-AB	Named Acct Rep/6 mos	3,000/6 mos.

ASSET MANAGEMENT PRODUCTS AND SERVICES

ASSET MANAGEMENT PRODUCTS:

POLYCENTER AssetWORKS

* Provides a practical solution for automating configuration and asset management tasks for the broad range of platforms across the enterprise network. The product facilitates the collection of hardware and software configuration data, automates the distribution and installation of applications and software upgrades, and provides remote control of PC's getting it all under control for today's System Manager.

* Centralized management of the enterprise, with distributed local control for remote branches or departments. AssetWORKS supports which-ever paradigm the customer wants to use when running his/her business.

* The broadest, multivendor platform support from one console and common data repository. In V1.0, the System Manager sitting in front of a Windows NT server can drag-and-drop software upgrade packages to be installed on DEC OSF/1, NetWare, MS-Windows, SunOS, OpenVMS, Windows NT, MS-DOS, Macintosh, OS/2, Windows for Workgroups, PATHWORKS, LAN Manager, ULTRIX, NT Advanced Server, and OpenVMS clusters across TCP/IP, Decnet, SNA, IPX/SPX, ISDN, and X.25 network environments. When the selected updates are completed, the updated inventory information can be viewed on the same console. In addition to hardware and software information, we collect users, printer queues, license and network information.

* POLYCENTER AssetWORKS extends Microsoft Systems Management Server to add the management of industry leading UNIX andOpenVMS systems from the same Windows NT console.

* Uses Microsoft Systems Management Server to collect desktop information and then integrates it with other industry standard enterprise manage-ment systems using the SNMP service included with Windows NT or accessing the SQL data repository.

MICROSOFT SYSTEM MANAGEMENT SERVER

* Hardware and software inventory automatically collects detailed configuration information about all PC's on the network.

* Software distribution and installation makes it easy to install applications, patches, or configuration files once on a PC, then automatically distribute them to other PC's on the local network and at remote sites.

* Remote control and troubleshooting allows a central help desk to take control of a PC running MS-DOS or Windows from over a local or wide area network.

* Managing applications that run from servers gives users a standard set of applications from any PC anywhere on the network.

* Reduce administrative costs.

POLYCENTER SYSTEM CENSUS FOR PC LANs

* Helps companies gain control of growing LAN environments by reducing the time and cost spent assembling a complete picture of the hardware and software in their computer environment by automatically auditing networked systems.

* Automatically discovers and displays all personal computer system and server resources, including Windows, DOS, Macintosh, OS/2, on popular network operating systems, including PATHWORKS, Novell Netware 2.1 & 3.0+ and 4.0; Microsoft LAN Manager 2.0+.

* Provides a mechanism for auditing non-networked and remote PCs.

* Provides for the consolidation of the LAN inventory data with POLYCENTER System Census product that resides on OpenVMS AXP or OpenVMS VAX.

POLYCENTER SYSTEM CENSUS

* Reduces time and cost for system managers to get a complete picture of the hardware and software in their computer environment by automatically auditing networked systems.

* Automatic and periodic gathering of hardware and software configuration information.

* Gathers and displays data from multiple platforms, including OpenVMS VAX, OpenVMS AXP and supports multiple networking environments including DECnet and TCP/IP .

POLYCENTER SOFTWARE DISTRIBUTION

* Improves productivity of system managers and reduces the cost of managing the computer environment by automating remote distribution and installation of operating system and layered application in a DECnet networked environment.

* Automates software distribution and installation to remote systems.

* Provides users with ability to manage and enforce prerequisites during software installation.

* Installs OpenVMS VAX from the PSD library server and OpenVMS AXP from CD to a remote system.

* Offers some system management features, including backup and restore and administrative services for DECnet node names, logical names, proxies and user accounts.

ASSET MANAGEMENT SERVICES

Asset Management Value Added Services are intended to help customers achieve significant gains in control and long-term cost reduction through planning, designing and implementing technology and service solutions specific to their requirements and environments.

* Process Evaluation Service - on-site high-level analysis of the current IT asset tracking, distribution, and control procedures. Evaluation process identifies customer business goals and operational objectives, evaluates current procedures, and designs an improved process which links manual procedures and automated tools to provide ongoing control and maintenance. This is a consulting service geared towards re-engineering the customers asset management business processes.

* Implementation Service - Project/Statement Of Work based service covering planning, design, and implementation of an automated asset management solution. Hands-on, integrated, installation, configuration, training and support. Implements recommendations developed in the Process Evaluation Service.

SOFTWARE PUBLISHING SERVICES

Software Publishing Services enables customers to purchase a service agreement under which Digital replicates and/or distributes software and associated documentation provided by the customer. With Software Publishing Services, you can offer prospects and customers two different levels of service to best meet their needs.

Basic Services - designed for customers with standardized needs that can be developed into complete customer platforms and database management contracts for installed bases. Included are:

* Bulk shipment of the entire order back to the customer after production
* Media and documentation kitting, packaging media and its associated documentation together
* Replication from a customer master onto either TK50, CDROM, Magtape, floppy QIC, or DAT
* Scheduled distribution, allowing a customer to designate shipments at pre-determined intervals
* Labeling to affix customized labels onto replicated pieces of media
* Printing black and white copies of documents, manuals and books
* Five business day turnaround

Turnkey Services - provides the widest possible range of services and constitutes a total solution to meet a customer's software publishing requirements:

* Replicate non-Digital formats
* Color printing of documents, manuals and books
* Drop shipments to multiple end-users
* International distribution
* Multiversion support to manufacture and/or distribute shipments made up of multiple versions of software
* Media conversions, i.e. TK50 master to TK70 cartridge and format to format conversions, i.e. OpenVMS to MSDOS
* Software update distribution management
* Custom packaging
* Custom mastering
* Archive record management
* Print production services for on-demand printing of documentation, low volume demand print and consulting for document design and production

Quoting and Booking Procedures

Sales Steps:

1. Qualify a customer for Software Publishing Services
2. Work with the Software Publishing Services Business Team to prepare a scope of work, ensuring that technical requirements are understood and addressed
3. Prepare the proposal and quote in a conference call with the Software Publishing Services Business Team
4. MCS Sales presents the solution/quote to the customer

Ordering information:

Quotes are generated referencing IAT #US-SPS-200 in the Special Instructions section using one of the following part numbers:

QA-MRDAA-AW   for individual orders
QT-MRDAA-CW   for customers purchasing an ongoing service relationship with Digital

For more information:
A representative of the Software Publishing Services Business Team can be contacted at: 800-448-6737

PC SOFTWARE PRODUCT SERVICES

TELEPHONE SUPPORT

Help Desk Backup Support - Tier 1: Available for customers whose in-house technical staff (often called a "Help Desk") provides direct support to their end-users, but who require backup support for a wide range of PC software. Digital's Help Desk Support coordinates support from multiple vendors and delivers a single, comprehensive solution to the customer's "Help Desk". Customers buy support for their entire PC population running industry standard software, excluding proprietary software users.

Three members of the customer's technical staff are authorized to contact the Customer Support Center. Digital will review requests for additional contacts on a case by case basis. These assigned contacts are expected to provide first-level problem resolution to the end-users before calling the CSC for additional support. The CSC will provide 24 x 7 remedial support for all applicable software products, including over 250 popular PC applications, operating systems, network operating systems.

Two billing options are available for Help Desk Backup Support Tier 1: Annual Contract and Solution Packs. Annual contract support is purchased per PC for the total number of users who require technical support from the customer's in-house staff. A Solution Pack is calls required to resolve one problem and offer an alternative purchasing method to contracts for a customer's technical staff who doesn't expect to make many calls to the CSC or for the customer who is a "power user" with system manager-level network operating system software privileges. Solution Packs do not include electronic access to databases via DSNlink or DSIN and are valid for 12 months from the date of purchase or until the number of solutions specified in the agreement have been used by the customer.

Help Desk Support Pricing is as follows for both options:

Annual Contract

(Note: Annual contracts are recommended for sites over 100 users.)

1-20 users	$30/month/PC	QR-SMHDS-YB
21-50 users	$10/month/PC	QR-SMHDS-YC
51-150 users	$ 5/month/PC	QR-SMHDS-YD
151-500 USERS	$ 3/month/PC	QR-SMHDS-YE
501+ USERS	$ 2/month/PC	QR-SMHDS-YF

Solution Packs

5 Solution Packs	$675	QR-SMHDS-Z1
10 Solution Packs	$1350	QR-SMHDS-Z2
25 Solution Packs	$3250	QR-SMHDS-Z3
50 Solution Packs	$6250	QR-SMHDS-Z4

Help Desk Backup Support - Tier 2: There are a few products that are considered more complex and more costly to support. Customers who have only these products can purchase Help Desk Support - Tier 2 standalone. However, customers must purchase Help Desk Support Tier 1 if they have products on the Tier 1 Supported Product List and wish to get support.
Pricing is as follows:

1-20 users	$50/month/PC	QR-SMHDB-YB
21-50 users	$28/month/PC	QR-SMHDB-YC
51-150 users	$13/month/PC	QR-SMHDB-YD
151-500 users	$5/month/PC	QR-SMHDB-YE
501 or> users	$4/month/PC	QR-SMHDB-YF

User Application Support - Provides end-users with direct access to Digital Software Support Specialists, and is designed for customers who either do not have an internal support staff for PC applications, or whose internal staff chooses not to directly support a particular platform or set of applications. The CSC provides 24 x 7 advisory, technical advisory support for applicable software products, including over 200 popular PC applications and operating systems. Network Operating Systems are covered only at the end user level. Customers buy support for their entire PC population running industry standard software, excluding proprietary software users.

Two billing options are available for User Application Support: Unlimited User Application Support and Solution Packs. Unlimited Application User Support is purchased per user and provides each user with unlimited software problem requests for a monthly service charge. Solution Packs are available for end-users who do not require frequent technical assistance, and are available in packs of 5, 10 or 25. Solution Packs are a one-time purchase, with each pack including all the calls required to resolve one problem. Solution Packs are valid for 12 months from the date of purchase or until the number of solutions specified in the agreement have been used by the customer, whichever occurs first. However, Solution Packs do not include electronic access to databases via DSNlink or DSIN.

User Application Support pricing for both options is as follows:

Annual Contract: Prices and discounts are as follows:

Annual Subscription (discount applied based on number of users)

QR-SMUAS-AA	$12/MO/PC or	$144/YR/PC

Use the table below to calculate the substantial dollar volume discount schedule for each subscription:

# SEATS	VOLUME PT. %	PRICE PER SEAT
0 - 25	0	$12.00
26 - 50	.96	$11.52
51 - 100	.93	$11.16
101 - 250	.90	$10.80
251 - 400	.83	$9.96
401 - 650	.75	$9.00
651 - 1000	.63	$7.56
1001 - 1500	.58	$6.96
>1501	.50	$6.00

This will take the total quantity of units x the multiplier

Example: 225 seats of User Application Support = QR-SMUAS-AA $12/MO. X 225 X .90 = $2430/MO.

Solution Packs:

Solution Packs:

5 Solution Pack	QR-SMUAS-B1	$175
10 Solution Pack	QR-SMUAS-B2	$350
25 Solution Pack	QR-SMUAS-B3	$830
5 Solution Pack Ext	QR-SMUAS-B6	$175
10 Solution Pack Ext	QR-SMUAS-B7	$350
25 Solution Pack Ext	QR-SMUAS-B8	$830

LICENSE UPDATE SERVICE

New Version License Service - New Version License Service (NVLS) grants the PC user the right-to-use all new versions of a particular PC software product released during the contract period. NVLS is attractive to customers who need to keep their PC applications updated with the latest software enhancements. Customers may purchase Help Desk Support or User Support without NVLS, or vice versa, based on their operational requirements on all Digital-developed PC products, as well as on a growing list of third-party developed products for which Digital has license distribution rights.

Qualified volume purchasers of NVLS are eligible for volume discounts based on the quantity of users per software product. Based on the following table, for example, a customer purchasing NVLS for 105 users of DECwrite DOS would be entitled to a 12% volume discount on that NVLS line item. Different products cannot be aggregated in order to receive a higher discount. Quantity discounts are as follows:

Order Quantity	Discount	Order Quantity	Discount
5-24	5%	400-499	22%
25-49	7%	500-599	24%
50-99	10%	600-699	26%
100-199	12%	700-799	28%
200-249	15%	800-899	30%
250-299	17%	900-999	32%
300-399	20%	1000+	35%

Model numbers are as follows:

QT-UPI*+-T9	NVLS, Traditional License, per PC
QT-UPI*+-JB	NVLS, Personal License, 1-user, per PC

* = language identifier

+-PC platform:
E - OS/2
F - MS/DO
G - MS-WINDOWS

H - APPLE MAC OS
W - PC software
9 - Processor Generic

For example, if the customer has 5 PCs running PATHWORKS for OS/2, quote quantity 5 of QT-YFWAW-T9.

SOFTWARE DISTRIBUTION SERVICES

Media and Documentation Distribution Service (MDDS) and Documentation Update Service are available on all Digital-developed PC products, as well as on a select group of third-party-developed products including Microsoft. Customers can order as many MDDS subscriptions as necessary, and individual users can share copies of media provided each user is supported with New Version License Service.

Model numbers are as follows:

QT-UPIAA-E*	Media and Documentation Distribution Service Documentation Update Service
QT-UPIAA-KZ	*-media type

MICROSOFT MAINTENANCE SERVICES

Microsoft customers now have a single source for worldwide distribution services. Digital offers customers with existing Microsoft licenses the ability to automatically receive upgrades for licenses, media and documentation for selected Microsoft products on all hardware manufacturers' platforms.

There are four service offerings under the Digital Service Agreement with Microsoft. The services are:

- New Version License Service (NVLS)	MVLP-M	QT-upiXX-TA
	MELP-M	QT-upiXX-TD
	Gov't	QT-upiXX-TB
	Edu.	QT-upiXX-TE
- Media Update Service		QT-upiXX-KC
(Media is 3.5" diskette)		
- Documentation Update Service		QT-upiXX-KZ
- Consolidated Distribution Service		QT-upiXX-C8

Microsoft Variable License PAK Maintenance (MLVP-M)

Customers with as few as 50 users of Microsoft products are eligible for MVLP-M. MVLP-M provides the customer with automatic distribution of license rights, media and documentation for properly licensed Microsoft products.

Microsoft Enterprise License PAK Maintenance (MELP-M)

Customers who agree to standardize on Microsoft software by placing at least one Microsoft product on each and every PC in their organization are eligible for Microsoft Enterprise License PAK Maintenance (MELP-M). Customers with a current MELP license agreement from a Microsoft Large Account Reseller (LAR) are eligible for MELP-M from Digital. Because of the increased commitment to Microsoft, MELP-M pricing for NVLS is less than comparable MVLP-M pricing. The NVLS part number format for MELP-M is QT-upi**-TD. Part numbers and prices for media and documentation services are the same for all Microsoft programs.

Microsoft Maintenance For Government

The part number format for Microsoft Government NVLS is QT-upi**-TB. Government customers only may purchase Microsoft Maintenance for a one-year period using these part numbers, which include an uplift from commercial pricing. Federal Government customers can use the GSA schedule to purchase NVLS as a Not Specifically Priced (NSP)/Open Market item. Media and documentation services are GSA contract line items. SPS GSA discounts apply to NVLS, media and documentation services.

Federal, State, and Local Government Agencies qualify to purchase under the Microsoft Maintenance for Government program. However, State and Local Government Agencies able to purchase for the two-year commercial term should do so at the established commercial prices.

Microsoft Maintenance for Education

Prices and part numbers for sale to education customers are also available for qualified educational institutions. The model number format for Education NVLS is QT-upi**-TE. Again, media and documentation prices are the same for all programs. All standard Microsoft business rules apply to the sale of Microsoft Maintenance into Education accounts, including a 2-year contract term, completion of the Software License Verification Agreement, and minimum order quantities.

Consolidated Distribution Service

Consolidated Distribution Service on CDROM is available by specific product pool. There are three pools of Microsoft products. Each product pool will be available by a unique part number and will contain multiple products specific to that environment indicated by the pool name. (e.x. Microsoft DOS/Windows applications, Office will contain all office related products such as MS-EXCEL, MS-WORD, etc.). Customers access those products for which they are licensed. Beginning with the 7/1/94 CDROM distribution, CDROM's will only contain products that have changed since last release. Microsoft will produce only two complete CDROM consolidated distribution sets per year, in May and November. Customers who purchase Microsoft Maintenance with CDROM distribution that wish to bring their software up-to-date immediately may purchase one of the following software kits. This kit may be copied to licensed systems.

```
*  QA-2BW8H-H8 - DOS, Windows, MAC Applications          $80.00
*  QA-2BY8H-H8  - Operating Systems                      $80.00
*  QA-2BX8J-H8   -  Server Applications                  $80.00
```

The prerequisite to these Microsoft kits is a valid Microsoft Maintenance agreement.

Business Practices
Business Practices have been established for this program. These business practices must be adhered to based on the agreement between Microsoft and Digital. Below is a list of non-standards or exceptions to the current business rules surrounding the sale of services specifically for this program.

* Not currently available through reseller channels

* **Software Verification** - Before Digital can sell service including Microsoft upgrades under a Digital Service Agreement, the customer is required to verify purchase of the original product license. Every Digital Service Agreement for Microsoft Maintenance MUST include an attachment containing the special terms and conditions required by the agreement with Microsoft.

* **Service Contract Term** - Each Digital Service Agreement sold must be a 2-year agreement, with the exception of the Federal Government who has the right to purchase service on an annual basis. Anything other than a 2-year term for non-government customers is not acceptable.

* Billing for these services will be _annual_ basis ONLY. No monthly or quarterly billing is allowable.

* **Minimum Order Quantity** - there is a minimum order quantity of 50 units for NVLS, 1 unit for Media and 50 units for documentation. This minimum offer per category applies on a per contract. Each Microsoft agreement must include NVLS and the associated media per licensed software product. Documentation is an optional service.

* For orders **greater than 1000** (NVLS only) customers will receive one free consolidated distribution service of their choice. The selection will be one CD from the list of 3 consolidated product pools, and is delivered at no charge for the two-year term of the agreement. Special part numbers with a value of "$0" are available for quoting this service.

* **Documentation** - purchasing of additional documentation must be **EQUAL** to or less than the total number of **NVLS** purchased.

* **Discounts** - standard Multivendor Customer Services (MCS) discounts DO NOT apply to the Microsoft Maintenance Program portfolio of products.

TELEPHONE SUPPORT
For those customers who wish to purchase telephone advisory services to complement the rights and media portion of the Microsoft Maintenance Program, User Application Support and Help Desk Support are available. Reference the respective Supported Products Lists for product coverage for each service offering. The U.S. Supported Product Lists for User Application Support and Help Desk Support may not contain all products listed under this agreement. Telephone Advisory services for all Microsoft products may NOT be available on a worldwide basis.

SOFTWARE VERIFICATION AGREEMENT

As a prerequisite to sell a Digital Service Agreement under this program, Digital must receive certification that the customer has originally purchased a valid Microsoft product license. This is accomplished by having the customer sign the **"Digital Equipment Corporation Software Upgrade Verification Agreement For Updates to Microsoft Products"**. Once this form is completed, the Digital Representative is required to keep the original copy on file at the local office along with the Service Agreement. A copy of this form is located on VTX CS_POLICY.

The Software Upgrade Verification Number at the top of this form shall contain the Digital Service Agreement contract number as the unique identifier.

Adding Products to a Digital Service Agreement
Once a Digital Service Agreement has been completed for a set number of software products, incremental units of Microsoft support may be added as allowed by Microsoft. Minimum order quantities still apply for add-on items. Reference VTX CUST_ADMIN 30.2.1 for detailed procedures.
All new Digital Service Agreements shall meet the minimum order quantity, outlined under the Program Details section, and must include a completed proof-of-purchase.

MICROSOFT PRODUCTS LIST

There are minimum order quantities of 50 units of NVLS per agreement. For Documentation Only Service, which is optional, there is also a minimum order quantity of 50 units per agreement. All contracts are a minimum of two years.

This chart is a complete list of Microsoft products supported by this agreement. Please refer to the price file for current pricing. Prices on file are for a one year period.

SQL definitions:

SQL Desktop (upi=0P2) - Single user standalone version (one interactive user) with up to 25 local database connections
SQL Workgroup (upi=2HM) - 10 interactive users with up to 25 local database connections
SQL Department (upi=0P1) - 64 interactive users with up to 128 database connections
SQL Enterprise (upi=0P3) - Unlimited interactive users with up to 32,767 database connections
SQL Programmers Tool Kit (upi=2HL) - Database library and Open data services, development libraries for C and Visual Basic and Open
    data base Connectivity (ODBC) Utilities

SQL Bridges (upi=2HN) - Connectivity to other data base servers

TRADITIONAL SOFTWARE PRODUCT SERVICES FOR PDP-11 SYSTEMS

DECsupport SERVICE FOR SOFTWARE AGREEMENT

The DECsupport Service for Software is the most comprehensive level of service. The features of this agreement are:

* On-site Assistance
    - Preventive Maintenance. The periodic installation of updates and Program Change Orders which in DIGITAL's opinion are required to ensure proper system operation.

    - On-site Remedial Support

* Telephone Assistance

* Technical Information
    - A Periodic Newsletter as available
    - Program Change Orders
    - Software Performance Reporting
    - Access to Digital Software Information Network (DSIN)

* Product Improvements
    - Software and Documentation Updates

The monthly charges for DECsupport Service for software agreement coverage are listed under the "DPMC" column.

BASIC SERVICE FOR SOFTWARE AGREEMENT

Basic Service for Software provides the following features:

* Telephone Assistance

* Technical Information
    - A periodic Newsletter as available
    - Program Change Orders
    - Software Performance Reporting
    - Access to Digital Software Information Network (DSIN)

* Product Improvements
    - Software and Documentation Updates

The monthly charges for Basic Service for Software coverage are listed under the "BSMC" column.

SELF-MAINTENANCE SERVICE FOR SOFTWARE AGREEMENT

The features of this Agreement are:
* Technical Information
    - A periodic Newsletter as available
    - Program Change Orders
    - Software Performance Reporting

* Product Improvements
    - Software and Documentation Updates

The monthly charges for Self-Maintenance Service for Software Agreement coverage are listed under the "SMMC" column.

SERVICE DESCRIPTIONS

All service descriptions are available on VTX. Select VTX CS_POLICY for the complete listing of current service descriptions.

SOFTWARE PRODUCT SERVICES FOR MASPAR SOFTWARE PRODUCT OPTIONS

Software Product Support services have been established for MasPar optional software products to allow Digital to re-sell MasPar services. The (QR-) service options in the table below include remote telephone support, rights-to-use new versions, and documentation updates as applicable.

Service Delivery:

A Digital customer may report problems to their local Digital off-site service center and calls will be passed through to MasPar for resolution.

> **MasPar will provide:**
> * **Remote telephone support**
> * **Critical on-site as determined by Digital and MasPar Support**
> * **Media and documentation updates directly to the customer.**

> **Digital will provide:**
> * **Customer contract management**
> * **Call management for software support**

Pre-Requisites:

MasPar System Services. Please reference the Systems/Services Price List for a list of the (FS-) system service part numbers for MasPar Systems.

Media Updates:

All media updates are shipped on one CD, distributed with the system software updates included in the FS- service part number.

Warranty:

MasPar software options are sold under MasPar's licensing terms and conditions, with a limited warranty consisting of substantial conformance to the published MasPar product description, in effect at the time of shipment.

SOFTWARE WARRANTY INFORMATION

Below are descriptions of various integrated support offerings; some of which are included as Standard Warranty for systems.

The following information refers to terms used in the System Support Warranty Table contained in the Warranty Section of the Preface Pages in the U.S. Systems Price List.

BSS (Basic System Service)

9-hour (8AM - 5PM), 5-day (Monday through Friday), priority response, monthly hardware on-site maintenance charges for Basic Hardware Service coverage and software telephone support 24-hours per day, 7 days per week, 365 days a year, Digital Software Information Network, critical on-site service for software, and right-to-use of new versions of kernel software.

DS9 (DECsystem Support 9 X 5)

9-hour (8AM - 5PM), 5-day (Monday through Friday), 2 or 4 hour response, monthly hardware on-site maintenance charges for DECservice and includes software telephone support 24-hours per day, 7 days per week, 365 days a year, Digital Software Information Network, critical on-site service for software, and right-to-use of new versions of kernel software.

DSS (DECsystem Support 24 X 7)

24-hour, 7 days per week, 2 or 4-hour response, monthly on-site hardware maintenance for DECservice and includes software telephone support 24-hours per day, 7 days per week, 365 days a year, Digital Software Information Network, critical on-site service for software, and right-to-use of new versions of kernel software.

BNS (Basic Node Service)

9-hour (8AM - 5PM), 5-day (Monday through Friday), priority response, monthly hardware on-site maintenance charges for Basic Hardware Service coverage and right-to-use new versions of kernel software.

DN9 (DECservice Node Service 9 X 5)

9-hour (8AM - 5PM), 5-day (Monday through Friday), 2 or 4-hour response, monthly hardware on-site maintenance charges for DECservice Hardware Service coverage and includes right-to-use new versions of kernel software.

DNS (DECservice Node Service 24 X 7)

24-hour, 7 day, 2 or 4-hour response, monthly hardware maintenance charges for on-site DECservice hardware coverage and includes right-to-use new versions for the operating system, DECnet VAXcluster, and workstation software.

GLOSSARY OF SOFTWARE-RELATED WARRANTY TERMS

Software components of Integrated System Warranty:

TELEPHONE ASSISTANCE:

Telephone assistance from Digital is provided to assist authorized Purchaser employees in the use of their Digital hardware, kernel software and layered products purchased with Warranties A, C, E, F, Q, X and Y. A toll-free telephone number and Customer Support Center (CSC) access number will be provided. Three (3) Purchaser employees will be authorized to call the Customer Support Center (CSC) for telephone assistance. The CPU type and serial number are needed to properly register the customer for telephone assistance.

CRITICAL ON-SITE SOFTWARE SUPPORT:

On-site support will be provided to assist in the resolution of problems in the software product which cannot be resolved remotely, and which Digital determines to be critical.

ADVANCED ELECTRONIC SUPPORT:

Advanced Electronic Support (AES) may include: Remote diagnosis; predictive hardware maintenance; electronic submission of service requests; two-way file transfer; electronic access to select Digital software product data bases; and electronic access to flash messages and software patches. To facilitate AES, Digital may, at our discretion, install at your site Digital service delivery tools such as DSNlink and VAXsimPLUS, or permit access to DSIN. Service tools and information obtained through their use are proprietary to Digital.

Service tools deployed to facilitate predictive maintenance or system initiated call logging, will only be installed at the customer's site when the entire system or cluster is under Digital Contract or warranty.

KERNEL SOFTWARE (WARRANTY):

During the warranty term, kernel software includes the operating system, and any other software products included with the hardware system model number.

RIGHT-TO-USE NEW VERSION OF SOFTWARE:

The Purchaser will be properly licensed for all new versions of the Digital-licensed software products which are covered by this Warranty and become available during the Warranty term.

INSTALLATION

NOTE: Software Installation is included only in the Standard Warranty for:

* All processors in High Performance tier (Warranty A).
* Software Installation of the operating system is included in the Standard Warranty for processes listed in the High VAX and MidVAX tiers (Warranty C or E, U.S. Systems/Services Price List).

As part of the Installation Service for Software, Digital will:

* Review the software installation procedure with a representative of the customer.
* Verify that all documentation and media are present.
* Prepare a backup copy of the installation media where applicable as stated in the Product Installation Guide.
* Install software, and perform a system generation where applicable.
* Update the software to the latest revision level and ensure that each peripheral device is working.
* Set up a user account and a user directory if applicable.
* Create a backup copy of the software installed.
* Provide listings of system generation dialog when a hardcopy terminal is available.

WARRANTY J - SOFTWARE FOUNDATION WARRANTY *List Level*

- Digital Developed Software products are warranted to conform to the applicable Software Product Description (SPD). This means that Digital will remedy any nonconformance when it is reported to Digital by the Customer during the warranty period.

- The warranty period for Digital Developed Software products is one (1) year. It begins when the software is installed or thirty (30) days after delivery to the End-User, whichever occurs first and expires three hundred sixty five (365) days later. All warranty related support for the software will end one (1) year after the release of the subsequent version.
- Warranty is provided only in the United States. Digital will provide a service location which will accept reporting (in a format prescribed by Digital) of a non-conformance problem caused when using the licenses software under conditions as defined by the SPD. Digital will remedy a noncon-formance problem in the current unaltered release of the licensed software by issuing correction information, such as correction documentation, corrected code or notice of availability of corrected coce, or a restriction of a bypass. The customer will be responsible for the preparation and submission of the problem report to the service location.

WARRANTY L - LAYERED PRODUCT SUPPORT WARRANTY *STANDARD Warranty*

- Layered Product Support Warranty is available for layered product licenses purchased either at time of initial system sale or separately as add-ons for existing systems.

- Layered Product Support Warranty provides the right-to-use new versions of layered product software.

- When a layered product purchased with Layered Product Support Warranty is installed on a system eligible for telephone assistance and advisory support, such as provided under DECsystem Support Service, Basic System Support, Software Support Service and Warranty A, C, E, F, Q, X, Y, the level of support provided on the system will be extended to include coverage of the layered product.

- If the warranty or maintenance agreement (contract) for that system expires during the warranty term of the layered product and the system is not placed under a DECsystem Support Service, Basic System Support or Software Support Service agreement, telephone assistance and advisory support for the layered product will no longer be provided.

- Layered Product Support Warranty includes one (1) year conformance to the Software Product Description (SPD).

- Layered Product Support Warranty does not include the distribution of software media and documentation updates and software installation.

- Third party vendor supported or customer supported third party software products sold by Digital may not be eligible for Layered Product Support Warranty. To obtain support for non-warrranted Digital supported third party software, customer should purchase a software Product Service agreement. Consult the price list for warranty and service eligibility.

- Warranty of third party software products sold by Digital is as designated in the Software Product Description (SPD). The term of the warranty, and the manner in which Digital will remedy any non-conformance is specified in the Software Product Description (SPD) or the price list. All other software is provided "as is". Digital does not warranty that the execution of Software shall be or uninterrupted error free. Digital does not warranty the form or content of third party distributed software or documentation, both of which Digital provides "as is". Certain third party distributed software is warranted by the third party.

FACTORY LOADED SOFTWARE WARRANTY

Software that is delivered on a system disk is not covered by warranty. It is provided as a convenience to the customer. The customer is solely responsible for completing the installation of the software. Digital encourages all customers to buy the VMS media and documentation kit which includes complete installation instructions. No other charge in Digital's current software warranty is implied by the pre-loading of the VMS distribution kit on the system disk at the factory. Refer to the Software Product Descriptions of VMS and DECnet-VAX for further warranty information.

GENERAL WARRANTY INFORMATION

THE FOLLOWING APPLIES TO ALL WARRANTY SUPPORT

ELIGIBILITY

Warranty on software products may not be honored if any of the following occurs:

1. Changes or modifications have been made to Digital product software code.
2. The System does not meet the minimum configuration requirements specified in the applicable Software Product Description.
3. The software product is not Digital-developed. Consult the price list to determine coverage under warranty or service agreements.

To reinstate warranty for the above, any nonconformance must be rectified by the customer. Digital has the right to perform an inspection at its discretion. Any equipment repairs and/or adjustments Digital determines are necessary in order to rectify any nonconformance will be made at Digital's Per Call rates, terms and conditions then in effect. Warranty is then reinstated, retroactively to the original date of warranty commencement. The inspection is free if no repairs are required.

EXCLUSIONS

The following services are not included as part of the Warranty support:

1. Service outside of the contracted hours of coverage.
2. Services which in Digital's opinion are required due to improper treatment or use of the equipment or software.
3. Services required due to unauthorized attempts by other than Digital personnel to repair, maintain or modify the equipment or software.
4. Services are required due to causes external to the Digital-maintained equipment or software.
5. Software product media and documentation updates.
6. Reconfiguration of equipment.
7. Individual software products which have been discontinued or reclassified as "Customer Supported". These products may be withdrawn from service upon one hundred eighty (180) days prior written notice, which notice shall not be issued prior to the end of the first year of service.
8. Individual hardware products that cannot, in Digital's opinion be properly repaired due to excessive wear or deterioration. These products may be withdrawn from service upon ninety (90) days prior written notice, which notice shall not be issued prior to the end of the first year of service.
9. Digital does not warrant that software licensed to a customer shall be error free, that the software shall operate with any hardware and software other than as specified in this SPD, that the software shall satisfy customer's own specific requirements, or that copies of the software other than those provided or authorized by Digital shall conform to the SPD.

   Digital makes no warranties with respect to the fitness and operability of modifications not made by Digital.

If the software fails to function for reasons stated above, the customer's warranty will be invalidated and all service calls will be billable at the prevailing per call rates.

WARRANTY SUPPORT TRANSFER POLICY

Warranty support is a product attribute and stays with the product if the product is re-sold within the fifty (50) United States or District of Columbia.

When equipment is resold during the warranty period, remaining warranty support may be transferred to a new owner within the (50) United States or District of Columbia. The original owner must contact Digital to arrange for the warranty support transfer. A warranty support transfer form must be signed by both the original owner and the transferee.

All De-installation/Re-installation guidelines must be met.

EXTENDED WARRANTY SUPPORT (For all products other than Digital PC's)

Extended Warranty Support allows a customer to lengthen the warranty period for an additional 12,24,36, or 48 months. Extensions to the first year warranty must be at the same level of service as the first year.

The Extended Warranty Support is quoted by AQS.

For customers with a DBA, the Extended Warranty Support fee is discountable under the Volume Discount Schedules (at Category A for end users, and Category B for Resellers). Extended Warratny Support is included in the DBA Aggregate Dollar Value.

EXTENDED WARRANTY EXCLUSIONS

In the event that the customer purchases Extended Warranty, the following restrictions apply:

1. Software products which are discontinued or reclassified by Digital as customer-supported may be withdrawn from coverage upon ninety (90) days prior written notice.

2. Service for any version of the software products covered under this warranty will end one hundred eighty (180) days after the release of subsequent version unless otherwise agreed. The System must be properly maintained at the latest Digital revision level and must contain at least the minimum hardware and prerequisite software specified in the most current Software Product Description (SPD).

3. Digital will remedy any nonconformance of the software product to the most current Software Product Description (SPD) when it is reported to Digital by the authorized customer contact during the Extended Warranty period, by issuing correction information such as: corrected documentation, corrected code, or notice of availability of corrected code, or a restriction or a bypass.

RESELLER WARRANTY SUPPORT OPTIONS

For additional information refer to Digital's U.S. Systems/Services Business Partner Supplement.

Consolidated Software Distribution and On-Line Documentation

Included below is information on Consolidated Software Distribution and On-Line Documentation Products and Services for CONDIST and CONOLD for VAX and RISC Systems; and Software Products Library kits for AXP Systems.

1. Software and Documentation on CD-ROM

For several years, Digital has distributed software products for VAX and AXP platforms on compact disc (CD-ROM) as a media type. With our software licensing technology, the License Management Facility (LMF), Digital has been able to offer a much more comprehensive offering in the form of Consolidated Software Distribution (CONDIST) and Consolidated On-line Documentation (CONOLD).

CD-ROM consolidated distributions offer our customers several unique advantages:

* Their compact size vs. their storage capacity - nearly 600mb of data can be stored on one disc.

* Makes zero delivery time of software media a practical reality - since virtually all Digital software will be on the customer site with each release, only the license PAK is required to enable software for use.

* Data Integrity - because they are a read-only medium, the contents are very secure against infection with various viruses, worms, etc. that worry so many customers these days.

* Network availability - because of the modest hardware cost of CD-readers, consolidated CD software solutions allow a customer to keep virtually all of Digital's software products available and on-line across their network all the time, thereby significantly reducing the time between the decision to purchase a license for a given product and the time of installation and use on any particular networked system.

* Documentation space savings and availability - with on-line documentation, workstation users, users with a DECwindows terminal or any other user whose desktop system is capable of DECwindows-compatible display, can share access to software product documentation without having to keep bookshelves full of paper manual and guides or having to leave their desk. This saves not only space and money for you, our customer, but also helps to save trees and the environment.

(a) CONDIST

Consolidated Software Distribution is a consolidated software solution for OpenVMS VAX, or ULTRIX VAX and ULTRIX RISC environments which delivers software binaries as a single offering on a set of compact discs. A valid software product license is required to access and use each software product on the disc because access is managed via LMF. Non-LMF compliant products are not included but are available by individual purchase.

In addition to the software binaries, the discs also include the following software product information; Software Product Descriptions (SPDs), System Support Addendum's (SSAs), Installation Guides, and individual product Cover Letters.

There is a separate ConDist offering for OpenVMS VAX, and a combined single offering for ULTRIX VAX and ULTRIX RISC.

(b) CONOLD

Consolidated Online Documentation is a consolidated documentation solution for OpenVMS VAX or ULTRIX VAX and ULTRIX RISC environments which delivers software product documentation for multiple software products as a single offering on a set of compact discs. This allows large numbers of manuals to be made available on a few discs. A valid software product license allows access to that respective product's online documentation. Currently, a Bookbrowser License is also included on ConOld which allows access to all product documentation on the disc set.

Full product documentation sets, including text and graphics, are included on the discs, along with an online reading tool and printing capabilities. These sets are the full manuals, updated with the latest revisions and corrections. As well as the standard English language manuals and guides, the same disc set also contains many foreign language versions of documentation sets.

There is a separate ConOld offering for OpenVMS VAX and a combined single offering for ULTRIX VAX and ULTRIX RISC.

(c) LIBRARY KITS

Library Kits are a consolidated software solution for OpenVMS AXP, and DEC OSF/1 AXP environments which delivers both software binaries and software documentation for multiple software products as a single offering on a set of compact discs. A valid software product license allows access to its product binaries and documentation. Currently, a Bookbrowser License is also included on Library Kits which allows access to all product documentation on the disc set.

Library Kits have the combined features of ConDist and ConOld, and are the primary delivery mechanism for AXP systems. There is a separate Library Kit offering for OpenVMS AXP and DEC OSF/1 AXP.

(d) CDDS

Consolidated distribution and documentation service combines the features of CONDIST and CONOLD as a subscription service.

2. HOW TO ORDER

One-time purchases are available through the local Digital sales representative or via DECdirect, 1-800-SOFTWARE.

The subscription services are each available as part of a Software Product Services (SPS) agreement through your local SPS contract administration contact.

OpenVMS VAX and ULTRIX VAX/RISC

One-Time Purchases:

Binaries:*

NAS CLIENT/SERVER PACKAGES

OVERVIEW

NAS Client/Server Packages deliver middleware software products for the integration of applications and data in a distributed multi-platform environment. They deliver to the customer the de jure and de facto public standards-based Application Programming Interfaces (APIs) and component software to make client/server computing possible.

The NAS Packages simplify the process of acquiring and maintaining client/server software with a single license, distribution kit, service and update contract from Digital. These packages are offered as standalone products as well as in complete HW/SW systems.

NAS Client 150
The NAS Client 150 provides base client software services; choice of network transports, Graphical User Interface (GUI), print and file sharing, object technology, clustering, and message queuing which allow the integration of data and applications in a distributed, multi-platform client/server environment.

NAS Base Server 200

The NAS Base Server 200 provides the following client & server services; choice of network transports, Graphical User Interface (GUI), storage management, remote SW distribution, object technology, and message queuing which allow the integration of data and applications in a distributed, multi-platform Client/Server environment.

NAS Client 250

Extends the NAS Client 150 base environment with system management, forms interface, and enhanced printing services.

NAS Server 300

Extends the NAS Base Server 200 with the following services; system management, forms interface, clusters, mail server, and enhanced printing.

NAS Production Server 400

Extends the NAS Server 300 with services to enhance the reliability and availability of applications, data and systems for business critical environments such as transaction processing.

All NAS Client/Server Packages provide the following customer benefits and features:

Simplified ordering - Each NAS client/server package has one part number, installation procedure, discounted price and service contract. This reduces the time, effort and cost of selecting base enabling client/server software.

Open Client/Server Environment - NAS Packages combine general purpose Middleware services and transport software to enable distributed multi-platform client/server computing. Customers can protect their investments by more fully integrating applications and data in a changing, yet standards-based Client/Server environment.

NAS Client/Server Packages are sold as line item software products, as well as included in complete HW/SW systems. The NAS Client 150 or 250 ships with OpenVMS VAX, OpenVMS AXP and OSF/1 AXP workstations, while the NAS Base Server 200 ships with server systems.

NAS PACKAGES FAMILY BY PLATFORM

NAME	OPENVMS/VAX	OPENVMS AXP	OSF1/AXP
NAS Client 150	x	x	x
NAS Base Server 200	x	x	x
NAS Client 250	x	x	x
NAS Server 300	x	x	x
NAS Production Server 400	x	x	

NOTE: YOU MUST ACQUIRE THE NAS PACKAGES KIT TO OBTAIN NAS COMPONENT LICENSES

The NAS package license, included with many sytstems, provides the PAK for the NAS Packages' license table (this table is part of the NAS Packages kit). You must install the NAS Packages kit in order to obtain the "right to use" the NAS components. The NAS Packages or ConDist kit also provides the component products media and documentation.

The NAS Packages Media and Documentation kits must be ordered separately from the HW system. To avoid duplication of media costs, the NAS Packages media and documentation ARE NOT included with every hardware system order.

NAS Server 300 V6.0 for OpenVMS VAX Systems
QL-MC2A*-
SPD 36.85

Target:
A management focused
server which extends
the NAS Base Server 200
to match the NAS
Client 250.

*Media is available either with NAS Package or through consolidated distribution service.

** Motif includes a number of local language variants. See the SPD or Installation Guide for full list.

*** DECnet/OSI supercedes DECnet-VAX Extensions.

1. Provided with the operating system.

2. PATHWORKS is licensed separately on a per client basis or with concurrent use server licenses, not provided with NAS.

3. The client software binaries must be downline loaded from an OpenVMS system running the POLYCENTER Software Distribution Server

4. Licensed with the appropriate DEC printer. Previously DEC PrintServer supporting Host for VMS.

NOTE 2: The rights to use InfoServer client software is licensed through the InfoServer server license (QL-YSH99-AA). Therefore the number of users per client software media and documentation kit is determined by the InfoServer being used with those clients. If an InfoServer 150, then the number of clients is 100. If an InfoServer 1000, then the number is governed by the base license (50 users) or the upgrade license purchased separately.

NOTE 3: The Client for OpenVMS VAX software is bundled into the OpenVMS operating system.

NOTE 4: The Client for OpenVMS AXP is bundled into the OpenVMS operating system.

NOTE 5: The Client for VXT is included in the InfoServer 150VXT and InfoServer 1000VXT packaged systems.

SOFTWARE VOLUME PRICING

Software Volume Pricing is the ability to receive a price based on the quantity of licenses purchased. The range of volume pricing available is:

CURVE A		CURVE B		CURVE C	
Quantity of Licenses	Volume Price Reduction	Quantity of Licenses	Volume Price Reduction	Quantity of Licenses	Volume Price Reduction
0 - 4	0	0 - 49	0	1 - 2	0
5 - 24	5	50 - 99	5	3 - 5	32
25 - 49	7	100 -199	6	6 - 9	43
50 - 99	10	200 -249	7	10 - 14	52
100 - 199	12	250 -299	8	15 - 19	57
200 - 249	15	300 - 399	10	20 - 999	60
250 - 299	17	400 - 499	11

N = Not Applicable

Volume pricing is available for licenses purchased at CLP or SLP.

Service should be quoted separately.

ORDER PROCEDURES:

There are no special part numbers to obtain software volume prices. The quoting and order systems will automatically determine the appropriate price for the quantity purchased. To ensure the volume prices are calculated, volume software orders should indicate NO PARTIAL SHIPMENTS.

Business Partners may take advantage of volume prices as well.

HOW TO DEFINE AND CONFIGURE SOFTWARE MODEL NUMBERS

☐1 ☐2 · ☐3 ☐4 ☐5 ☐6 ☐7 · ☐8 ☐9

☐1 ☐2 SOFTWARE CATEGORY

QL = LICENSES
QA = MEDIA AND DOCUMENTATION KITS
QT = SPS SERVICES
QB = PACKAGED SOFTWARE COMPONENTS
    (License/Kits/Service)
QP = PACKAGED SOFTWARE LICENSES
    (@3, 4, 5 = Unique Package Identifier)
    @6, 7, 8 AND 9 = Variables)
QM = LICENSES (@7 and @9 = Variables)

☐3 ☐4 ☐5 UNIQUE PRODUCT IDENTIFIER

UNIQUE 3 CHARACTER CODE ASSIGNED TO EACH PRODUCT.

SEE "SOFTWARE INDEX BY UPI" SECTION IN BACK OF BOOK.

☐6 LANGUAGE IDENTIFIER
(For @6 Position of Media/DOC (QA),
License (QL) and Service part numbers (QT)

A =	AMERICAN ENGLISH	M =	SWEDISH
D =	DANISH	P =	FRENCH
E =	BRITISH ENGLISH	S =	SPANISH
G =	GERMAN	8 =	MULTILINGUAL
H =	DUTCH	9 =	LANGUAGE NEUTRAL

☐7-a PLATFORM TABLE
(For @7 Position of User Licenses/User Services Only)

A =	VMS	J =	SUN OS
C =	ULTRIX	K =	Device Specific
D =	SCO/UNIX	L =	Platform Independent
E =	OS/2	M =	OSF
F =	MS/DOS	S =	WINDOWS NT
G =	MS-WINDOW	9 =	Hardware Dependent
H =	APPLE MAC		(Refer to SPD)

☐7-b VAX SYSTEM CLASS TABLE
(For @7 Position of Selected License (QL)
and Service (QT) part numbers)

@7 SYSTEM CLASS

5 = ENTERPRISE

OPERATING SYSTEM SUPPORT

A = Software Support Service (SSS)
N = Software Node Service (SNS)

Position 7 is processor tier.
For traditional licenses (QL@8=A), position 9 is "9".
For sytem traditional licenses (QL@8=6), position 9
matches license.
For OpenVMS VAX & ULTRIX, refer to operating system pages.

LAYERED PRODUCT SUPPORT (LPS)

L = LPS for Clusterwide (QL@8=J) and Traditional
(QL@8=A) Licenses
D = LPS for Concurrent Use Licenses (QL@8=3)
M = LPS for Personal Use License (QL@8=2)
W = LPS for System Traditional Licenses (QL@8=6)
V = LPS for user licenses (Note A)

LPS POWER RATINGS (NOTE B)

B = 10	**H** = 300	**N** = 1200	**V** = 9000
C = 20	**J** = 400	**Q** = 1800	**8** = Incremental Block
D = 50	**K** = 600	**S** = 2400	5000 LPS Unit
E = 100	**L** = 900	**T** = 3600	**9** = No License
F = 200	**M** = 1800	**U** = 7200	

For personal use and concurrent use licenses position 9
matches license. "B" = 1 user.
For system traditional licenses position 9 matches license

NEW VERSION LICENSE SERVICE (NVLS)
T = NVLS for traditional license (QL@8=A) and PC Licenses
(QM@8=A)
J = NVLS for Personal Use licenses (QL@8=2)

For Traditional license, position 9 = "9"
For PC license, position 9 matches license.
For Personal Use license position 9 matches license. "B" = 1 user

---

SOFTWARE DISTRIBUTION SERVICES

SYSTEM LEVEL VALUE ADDED SERVICES

P = Software System Management Service
R = Software Update Installation Service

C = VAXcluster - MicroVAX/Workstations Only
E = VAXcluster - High-end Or Mixed
9 = Single System Coverage

OTHER SERVICES

X = Packaged Product Service (For shrinkwrap, QB@8=S, packages. Position 9 matches package.
6Z = Additional CSC Contact (operating systems only)
I9 = Installation

Note A: Multi-user LPS is used with VMS and OSF operating system user licenses (QL@8=B) and with selected third party
products offered in user increments.
Note B: Power rated LPS is offered for ClusterWide licenses and selected older OpenVMS VAX and ULTRIX products with
traditional licenses. Not offered for new products with traditional licenses.
Note C: Service type "K" is also used with Media Distribution Service in the MicroSoft Maintenance program.
@3, 4 and 5 = IPI
@6 = Language
@7 = Varies with service type

NOTE 1: OpenVMS VAX IA User Licenses require OpenVMS VAX Version 5.5 or greater. OpenVMS VAX IA User Licenses provides the right to interactively use the operating system by the specified number of concurrent users on a designated, single OpenVMS VAX system. The OpenVMS VAX IA User Licenses may be moved from any OpenVMS VAX system to another at the customer's discretion. The IA User licenses are not sharable in an OpenVMS VAXcluster.

NOTE 2: OpenVMS VAX Distributed IA User Licenses require OpenVMS VAX Version 6.0 or greater. OpenVMS VAX Distributed IA User Licenses provides the right to interactively use the operating system by the specified number of concurrent users on a designated OpenVMS VAX system or may be shared in an OpenVMS VAXcluster. OpenVMS VAX Distributed IA User Licenses can also be moved from any OpenVMS VAX system to another at the customer's discretion.

+ OpenVMS Base and SMP Extension to the Base License is included with the purchase of an OpenVMS VAX System.

* Purchase of Update License requires proof of underlying license. Update Licenses do not deliver a License PAK.

**Charges for Services are monthly charges except for the Installation, which is a one time charge.

Note 1: The price of the TK50 and Magtape VMS Media & Documentation Kit is $2900 for the Standard +Optional Kit and $1000 for the Base kit. The CD-ROM VMS Media & Documentation Kit is $2500 for the Standard+Optional kit and $600 for the Base kit.
For TK50 Hkits, the Mandatory Update Media (MUP) is TK50; there is no stand-alone (S/A) backup media. For Magtape Hkits, except where noted, the MUP media is Magtape and TK50 is the associated S/A backup media. CD-ROM Hkits include the MUP and S/A backup media.

Note 2: The Magtape Hkit may be ordered for this system if you are adding this CPU to an existing VAXcluster that has a member with a Magtape drive - Please check you configuration before ordering.

Note 3: Standard+Optional Documentation Kit is not available with this system.

+ OpenVMS License included with the systems purchase.
* Charges for Services are monthly charges except of the installation, which is a one time charge.
** Purchase of Update License requires proof of underlying licenses. Update Licenses do not deliver a License PAK.

OpenVMS VAX Operating System

*Note 1: The price of the TK50 and Magtape VMS Media & Documentation Kit is $2900 for the Standard +Optional Kit and $1000 for the Base kit. The CD-ROM VMS Media & Documentation Kit is $2500 for the Standard+Optional kit and $600 for the Base kit.
For TK50 Hkits, the Mandatory Update Media (MUP) is TK50; there is no stand-alone (S/A) backup media. For Magtape Hkits, except where noted, the MUP media is Magtape and TK50 is the associated S/A backup media. CD-ROM Hkits include the MUP and S/A backup media.
*Note 2: The Magtape Hkit may be ordered for this system if you are adding this CPU to an existing VAXcluster that has a member with a Magtape drive - Please check you configuration before ordering.
*Note 3: Standard+Optional Documentation Kit is not available with this system.

+ OpenVMS License included with the systems purchase.
* Charges for Services are monthly charges except of the installation, which is a one time charge.
** Purchase of Update License requires proof of underlying licenses. Update Licenses do not deliver a License PAK.

OpenVMS VAX Operating System

Note 1: The price of the TK50 and Magtape VMS Media & Documentation Kit is $2900 for the Standard +Optional Kit and $1000 for the Base kit. The CD-ROM VMS Media & Documentation Kit is $2500 for the Standard+Optional kit and $600 for the Base kit.
For TK50 Hkits, the Mandatory Update Media (MUP) is TK50; there is no stand-alone (S/A) backup media. For Magtape Hkits, except where noted, the MUP media is Magtape and TK50 is the associated S/A backup media. CD-ROM Hkits include the MUP and S/A backup media.

Note 2: The Magtape Hkit may be ordered for this system if you are adding this CPU to an existing VAXcluster that has a member with a Magtape drive - Please check you configuration before ordering.

Note 3: Standard+Optional Documentation Kit is not available with this system.

\+ OpenVMS License included with the systems purchase.

* Charges for Services are monthly charges except of the installation, which is a one time charge.

** Purchase of Update License requires proof of underlying licenses. Update Licenses do not deliver a License PAK.

Note 1: The price of the TK50 and Magtape VMS Media & Documentation Kit is $2900 for the Standard +Optional Kit and $1000 for the Base kit. The CD-ROM VMS Media & Documentation Kit is $2500 for the Standard+Optional kit and $600 for the Base kit.
For TK50 Hkits, the Mandatory Update Media (MUP) is TK50; there is no stand-alone (S/A) backup media. For Magtape Hkits, except where noted, the MUP media is Magtape and TK50 is the associated S/A backup media. CD-ROM Hkits include the MUP and S/A backup media.

Note 2: The Magtape Hkit may be ordered for this system if you are adding this CPU to an existing VAXcluster that has a member with a Magtape drive - Please check you configuration before ordering.

Note 3: Standard+Optional Documentation Kit is not available with this system.

+ OpenVMS License included with the systems purchase.

* Charges for Services are monthly charges except of the installation, which is a one time charge.

** Purchase of Update License requires proof of underlying licenses. Update Licenses do not deliver a License PAK.

VTX OpenVMS VAX

Model Number	Description	Price
QA-031AA-GZ-6.0	**DEC VTX V6.0 Doc Kit**	**KIT PRICE: $500**
	Contains All Items Listed Below:	
AA-PKFBC-TE	DEC VTX INSTALLATION GUIDE	$ 30
AA-PKFCB-TE	DEC VTX SERVICE PROVIDERS GDE	*
AA-PKFDB-TE	DEC VTX APPLICATION PROV. GDE	*
AA-PKFEB-TE	DEC VTX INFO. PROVIDERS GUIDE	$ 65
AA-PP0NB-TE	DEC VTX TXT RETRIEVAL SYSTEM	$ 45

WANrouter 90/150/250

Model Number	Description	Price
QA-GZZAA-GZ-1.2	**DEC WANrtr 90/250 DOC KIT**	**KIT PRICE: $100**
	Contains All Items Listed Below:	
AA-Q7WPA-TE	DEC WANrouter 90/250 User Gde	*

WANrouter 90/150/250 (continued)

Model Number	Description	Price
AV-Q7Y8A-TE	DEC WANrouter 90/250 Cvr Ltr	*

Wordperfect for VMS

Model Number	Description	Price
QA-077AA-GZ-5.1A	**WP WS VMS REF MAN DOC KIT**	**KIT PRICE: $30**
	Contains All Items Listed Below:	
BX-PB6YB-XE	WP WKST VMS REF MANUAL	*
QA-077AB-GZ-5.1A	**WP WS VMS WRKBK DOC KIT**	**KIT PRICE: $20**
	Contains All Items Listed Below:	
BX-PTCBB-XE	WP WKST VMS WORKBOOK	*
QA-077AC-GZ-5.1A	**WP ALL1 INT USER MAN DOC KIT**	**KIT PRICE: $10**
	Contains All Items Listed Below:	
BX-PBEFB-XE	WP A1 INT USER MANUAL	*

Worldview Viewer OpenVMS VAX

Model Number	Description	Price
QA-2MVAA-GZ-1.05	**WV VIEWER-am V/V DOC KIT**	**KIT PRICE: $50**
	Contains All Items Listed Below:	
BX-Q4D4A-XE	SUB 75031-0003 WV VIEWER DOC	*

X.500 Directory Service OpenVMS VAX

Model Number	Description	Price
QA-0P4AA-GZ-1.2	**X.500 DOC KIT**	**KIT PRICE: $400**
	Contains All Items Listed Below:	
AA-PU9HB-TE	X.500 MANAGEMENT GUIDE	*
AA-PU9JB-TE	X.500 PROBLEM SOLVING	*
AA-PUCFA-TE	X.500 PROGRAMMING	*
AA-PUCGA-TE	X.500 PROGRAMMING REFERENCE	*
AA-PXVFA-TE	X.500 OSI-Abstract-Data Man	$ 60
AV-PUCHB-TE	INSTALLING ON A VMS SYS	*
AV-PUCJA-TE	INSTALLING ON AN ULTRIX SYSTM	*

POLYCENTER SECURITY Compliance Manager OpenVMS AXP

Model Number	Description	Price
QA-2UTAA-GZ-2.3A	**POLY_SEC_CM_V/A_V2.3A DOC**	**KIT PRICE: $110**
	Contains All Items Listed Below:	
AA-PGBXC-TE	POLY SEC CM OVMS USER'S GDE	$ 80
AA-PGBYC-TE	POLY SEC CM OVMS INSTL GUIDE	$ 30
AV-Q453B-TE	POLY SEC CM OVMS READ ME 1ST	*

POLYCENTER System Watchdog Consolidator OpenVMS AXP

Model Number	Description	Price
QA-37KAA-GZ-2.2	**POLY SYSWD V/A DOC KIT**	**KIT PRICE: $95**
	Contains All Items Listed Below:	
AA-PSY2B-TE	Sys Watchdog Cons Install Gde	*

(continued)

POLYCENTER System Watchdog Consolidator OpenVMS AXP (continued)

Model Number	Description	Price
AA-PSY3B-TE	Sys Watchdog Cons User's Gde	*
AA-QBUZA-TE	POLY SYS WTCH DOG REL NOTES	*
AV-PSY4B-TE	Sys Watchdog Cover Ltr	*

Reliable Transaction Router (RTR) Server OpenVMS AXP

Model Number	Description	Price
QA-2AQAA-GZ-2.2B	**Reliable Trans Router V/A Doc**	**KIT PRICE: $160**
	Contains All Items Listed Below:	
AA-PHWGC-TE	DECrtr Appl Writer's Ref Man	$ 60
AA-PHWHC-TE	DECrtr System Manager Manual	$ 90
AA-PHWJD-TE	DECrtr Installation Guide	$ 35
AV-Q393C-TE	Reliable Trans Router Cvr Ltr	*

Security Enhanced VMS (SEVMS) OpenVMS AXP

Model Number	Description	Price
QA-3DVAA-GZ-6.1	**SEVMS V/A DOC KIT**	**KIT PRICE: $40**
	Contains All Items Listed Below:	
AA-QC03A-TE	SEVMS Install Gde & Rel Notes	$ 15
AA-QC05A-TE	SEVMS User's Guide	$ 25
AA-QC06A-TE	SEVMS Security Manager's Gde	$ 25
AV-QC08A-TE	SEVMS AXP Cover Letter	$ 10

Session Support Utility (SSU) OpenVMS AXP

Model Number	Description	Price
QA-2T7AA-GZ-2.0	**SSU SOFTWARE V/A DOC KIT**	**KIT PRICE: $25**
	Contains All Items Listed Below:	
AA-JB84D-TE	INSTALLING AND USING SSU	$ 25

SNA 3270 Application Services Development OpenVMS AXP

Model Number	Description	Price
QA-2FKAA-GZ-1.1	**SNA 3270 DV OVMS V1.1 DOC KIT**	**KIT PRICE: $160**
	Contains All Items Listed Below:	
AA-PPV4B-TE	DEC SNA 3270 APPLICATION INST	$ 25
AA-PRDKB-TE	DECforms Use With 3270 Term	$ 70
AV-PUCDB-TE	SNA 3270 DV COVER LETTER	*
AA-PPV3B-TK	DEC SNA 3270 APPLICATION PROG	$ 70

Soft PC/SoftWindows OpenVMS

Model Number	Description	Price
QA-YNWAA-GZ-4.0	**DEC SOFTPC V4.0 FOR VMS DOC**	**KIT PRICE: $40**
	Contains All Items Listed Below:	
AA-PKKRB-TE	DEC SOFTPC VMS REL NTS	$ 10
AV-PG6YD-TE	BEFORE YOU INSTALL LTR/VMS	*
99-07691-03	AUTO BAG, 10.5 X 15	*
AA-PXCDA-TE	DEC SOFTPC VMS USERS GUIDE	$ 30
QA-YNWAB-GZ-5.0	**SoftPC/SoftWN V/A DOC KIT**	**KIT PRICE: $40**
	Contains All Items Listed Below:	
AA-QBWDA-TE	SoftPC/SoftWindows User Guide	*
AV-QBWFA-TE	SoftPC/SoftWindows Cover LTR	*

Storage Library System (SLS) Manager OpenVMS AXP

Model Number	Description	Price
QA-0YPAA-GZ-2.4A	**SLS V/A DOC KIT**	**KIT PRICE: $210**
	Contains All Items Listed Below:	
99-07642-01	BINDER, 1 1/2"	$ 15
99-07643-01	BINDER, 2"	$ 15
AA-KY16G-TE	SLS Installation Manual	*
AA-KY18D-TE	VAX SLS USERS GUIDE	$ 60
AA-NA48C-TE	VAX SLS STORAGE ADMIN GDE	$ 50

+ DEC OSF/1 2 User Base License included with the System Purchase.

++ DEC OSF/1 SMP Extension to the Base System License is included with the system upgrade package

* Purchase of Update License requires proof of underlying license. Update Licenses do not deliver a License PAK.

** Charges for Service are monthly charges except for the Installation which is a one time charge.

NOTE: DEC OSF/1 Interactive User Licenses are shown at the end of these charts. These licenses are generic and will allow access by additional users to the DEC OSF/1 Operating System Software on any supported AXP system. DEC OSF/1 Unlimited User Licenses vary by System Class. All DEC OSF/1 User Licenses require the presence of an appropriate DEC OSF/1 2 User Base License.

+ DEC OSF/1 2 User Base License included with the System Purchase.

++ DEC OSF/1 SMP Extension to the Base System License is included with the system upgrade package

* Purchase of Update License requires proof of underlying license. Update Licenses do not deliver a License PAK.

** Charges for Service are monthly charges except for the Installation which is a one time charge.

NOTE: DEC OSF/1 Interactive User Licenses are shown at the end of these charts. These licenses are generic and will allow access by additional users to the DEC OSF/1 Operating System Software on any supported AXP system. DEC OSF/1 Unlimited User Licenses vary by System Class. All DEC OSF/1 User Licenses require the presence of an appropriate DEC OSF/1 2 User Base License.

Telephone Support For The Sun Operating System - SunOS

The new Sun Operating System Telephone Support provides remotely delivered assistance, 12 hours a day, 5 days a week, (8AM to 8PM, Eastern Time) on all Digital supported SunOS software products (see list below). This service provides software usage assistance and targets a centralized support environment that supports users through a call-screening function. This service is separate and distinct from existing telephone support offerings and does NOT include new versions of the software, on-site support for software installation of software media patches, or media and Documentation Distribution (MDDS).

Please contact your local support representative or Remote Sales Support (1-800-DEC-SALE) for further assistance.

Supported Products

* Sun O/S Version 4.1.1b and higher
* OpenWindows Version 1.1 and higher
* Open Look Version 1.1 and higher
* XGL Version 1.0 and higher
* Open Windows Desk Set Version 1.1 and higher
* C Version 1.0 and higher
* SunLink DNI Version 6.0 and higher
* Ethernet/TCP/IP
* ONC/NFS
* Xview/NDE
* X11/NeWS
* SunView

Pricing Information

Model Number	Description	Base Price
QT-MY7AA-Z9	SunOS Telephone Support 12x5	$25
QT-MY7AA-6Z	Additional CSC Contacts	$200

The following Volume Discounts apply:

	Unit Quantity	Volume Price Reduction In Percentage
NOTE: Multiply Unit Quantity by Base Price ($25) minus Volume Price Percentage Discount. (Example:40 units X $25 - 16% = $840 mo.)	0 to 5 units	0%
	6 to 20 units	8%
	21 to 50 units	16%
	51 to 100 units	20%
	101 to 250 units	24%
	251 to 500 units	28%
	501 + units	36%

***Standard Digital Services discounts are ineligible. Only prepayment discounts apply.**

Microsoft (R) Windows NT(tm) Software Products List

The following Microsoft, Digital-developed, and other third-party software products supporting the Microsoft Windows NT Operating System that are sold by Digital are listed below.

This listing should assist users of this document in easily identifying which products support the Microsoft Windows NT Operating System environment for both x86 and Digital Alpha systems.

Additional Windows NT Applications can be found in the Solution Point catalog (VTX LOS EC-N3438-69) or by using the InstaFacts automated fax service. US call 1-800-723-4431 and request document #1160; all other international locations please dial 1-908-885-6426 and request document #1160.

WNT Server MCD/LIC PKG	QB-23CAA-SB	825	Y	H
WNT Server UPG MCD/LIC PKG	QB-23CAB-SB	699	Y	H

This kit is available to
existing customers of Digital
x86-based and Alpha AXP
systems currently running
Windows NT AS V3.1 and allows
them to UPGRADE to the
current version - Windows NT
Server V3.5. This upgrade
kit incldes 250 Client Access
License.
Customers who purchased
Windows NT AS V3.1 with a
Digital system BEFORE May 15,
1994, must purchase an
upgrade to V3.5; see
BR-23CAB-SA for information
regarding how to qualify for
a FREE V3.1 to V3.5 WNT
Server UPGRADE. Contact
DECDIRECT - 1-800-Digital, or
DESKTOP DIRECT -
1-800-722-9332 to order.
(See part number QB-0QRAA-SB
for Windows NT Workstation
V3.5 UPG information).
Customers must provide proof
of original NT System order
to qualify.
This upgrade kit contains all
needed elements to update
Windows NT AS V3.1 to Windows
NT Server V3.5 operating
system software, as well as
system firmware, ECU and
additional notes to update
hardware system to support
Windows NT Workstation V3.5.
Windows NT Server has been
optimized to provide the
highest level of network
responsiveness. Specific
optimizations for the
server include better memory
usage to cache large amounts
of data, higher system
priority for network users,
and improved efficiency of
32-bit server applications.
Improvements to Windows NT
Server V3.5 include:
Size and Performance
Improvements
Server choice as domain
controller or dedicated
server
Improved Connectivity
- new TCP/IP transport
- added TCP/IP addressing
service called Dynamic
Host Configuration
Protocol
- added TCP/IP name re-

Windows NT Server Operating System (continued)

solution service called
Windows Internet Naming
Service
- rewrote the IPX/SPC
stack for greater perfor-
mance
- included a client for
Windows NT that provides
access to NetWare servers
- many improvements to
Remote Access Service
(RAS) to provide a com-
prehensive remote
computing solution
New features of Windows NT
V3.5 include:
Improved Setup program
Reduced memory working set
(reduced by 4-8 megabytes
depending on configuration)
Improved performance through-
out
Multiple VDM Support (each
application runs in its own
memory address space. Full
OLE and DDE support are
maintained between separate
VDMs)
OpenGL(tm) graphics support.
Integrated NetWare(r) connec-
tivity
Long file names for FAT file
system
The kit includes: CDROM, (x86
boot floppies), software
license agreement for Windows
NT Server and 250 Client
Access License, and one copy

Windows NT Workstation Operating System (continued)

of widely available high-end applications for software development, engineering, financial analysis, scientific and business-critical tasks. It also runs thousands of standard Windows (tm) applications. Windows NT Workstation provides a high degree of protection for critical business application and their data, while providing a complete security system for desktop computers. New features of Windows NT V3.5 include:
Improved Setup program
Reduced memory owrking set (reduced by 4-8 megabytes depending on configuration)
Improved performance throughout
Multiple VDM Support (each application runs in its own memory address space. Full OLE and DDE support are maintained between separate VDMs)
OpenGL(tm) graphics support.
Integrated NetWare(r) connectivity
Long file names for FAT file system
The kit includes: CDROM, (x86 boot floppies), software license agreement and one copy of the Windows NT Workstation Installation and User's Guide. The CDROM also contains a readable copy of the user documentation. An optional hardcopy documentation set is available separately.
