Introduction

This edition of the Hardware Documentation Kit Handbook introduces a new feature - the 'Multi-media Diagnostics Grid.' Each grid will allow you to select diagnostic software for your Digital system on any loading media available. Ordering part numbers for all media and listings are provided. For further details on how to use the grid see page 75.

This handbook contains documentation kits and diagnostics designed to support Digital's current, high volume products. The book is divided into three distinct sections. Section I supports option level products; Section II supports packaged systems; and Section III supports Multi-media Diagnostics. The Table of Contents lists products by their Option Designation, while the index sorts products by Kit Number.

Packaged System Matrices (Section II) have been designed for each processor type. The left hand margin of each matrix lists the packaged system designations alphanumerically. The kit numbers run across the top of the matrix. To use the matrix, simply scan the left side of the page for the desired Packaged System Designation and select the kits from the top of the page which have a check mark. Contents of these kits may be reviewed by locating the appropriate kit in the Index.

The amount and types of documentation available for the individual devices vary depending upon the complexity and application of the device. The advantage of kitting these documents is twofold: 1) it simplifies ordering by reducing the number of line items, and 2) it often reduces expense, since most kits are priced below the sum of their loose piece prices. Prices for Hardware Documentation Kits and Diagnostics may be found in Digital's Accessories and Supplies Group Price List.

If you are interested in loose piece hardware documentation or if you are unable to locate a kit for a device you support, you should consider using the Digital Accessories and Supplies Group Documentation Products Directory. If you do not receive the directory you may place yourself on the distribution list by using the convenient form located in the back of this handbook.

Orders may be placed through your local Digital Sales Office. In the Continental U.S. and Puerto Rico, orders may also be placed by calling toll free 800-258-1710. When ordering, please provide the Kit Part Number and Kit Name.

More detailed ordering information begins on page iii.

How to Order

In Continental USA and Puerto Rico, call:

or mail order to:

800-258-1710

Digital Equipment Corporation
P.O. Box CS2008
Nashua, NH 03061

In Alaska, Hawaii or New Hampshire, call:

or mail order to:

603-884-6660

Digital Equipment Corporation
P.O. Box CS2008
Nashua, NH 03061

Diagnostic Kits

INTRODUCING THE MULTI-MEDIA DIAGNOSTICS GRID

DIGITAL has traditionally offered diagnostic software on papertape. Over the years the use of papertape readers has declined and magnetic media has grown in popularity for loading diagnostics. Although DIGITAL'S diagnostics were also available on various media, it was a cumbersome task to cross-reference part numbers from media to media. The multi-media diagnostics grid will alleviate any confusion associated with locating diagnostic software on various media.

To utilize the grids a basic understanding of DIGITAL'S part numbering scheme is necessary. The 'five - two' numbering scheme is used for diagnostic kits; the 'two - five - two' numbering scheme is used to identify loose piece diagnostic components such as disks, magtapes, etc.

The following illustrations explain both numbering schemes in detail.

The 5-2 Numbering Scheme

The format for diagnostic kit model numbers is as follows (5-2 number):

Example:

Software Type ZJ010-RZ

Q System Software

Z Diagnostic Software

CPU Identifier ZJ010-RZ

D VAX-11/750

E VAX-11/780

F PDP-8

J PDP-11

P PDP-11/40 or higher

R PDP-11/45 or higher

Unique Identifier ZJ010-RZ

The unique identifier will be numerical characters.

License and Support ZJ010-RZ

This single character indicates whether or not a license is required.

- C Binary License, no support
- D License only
- F Microfiche
- P No License, Binaries only
- R No License, Binaries Documentation

Media ZJ010-RZ

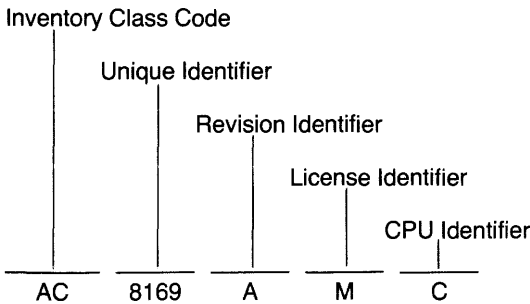

This single character identifies the distribution media. The following codes are assigned:

- A Linctape
- B Papertape
- C Dectape
- D 9 Track Magtape, 800 BPI, 600 ft
- E RK05 Disk Cartridge
- F 7 Track Magtape, 800 BPI, 600 ft
- G TU58 Dectape II Cartridge
- H RL02 Disk Cartridge
- M 9 Track Magtape, 1600 BPI, 2400 ft
- P 9 Track Magtape, 800 BPI, 2400 ft
- Q RL01 Disk Cartridge
- R Microfiche
- T RK06 Disk Cartridge
- V RK07 Disk Cartridge
- X RX02 Floppy Diskette
- Y RX01 Floppy Diskette
- Z No Hardware Dependency

The 2-5-2 Numbering Scheme

The format for the DIGITAL standard numbering system is as follows (2-5-2 number):

Example:

Inventory Class Code AC-8169A-MC

The inventory class code has been defined as MEDIA designation. The diagnostic media designations are:

AC	Listing/Document	AS	RX01 Floppy Diskette
AH	Microfiche	AT	Card Deck
AK	Papertape	AX	RL01 Disk Cartridge
AL	Dectape and Linctape	AY	RK07 Disk Cartridge
AM	RK06 Disk Cartridge	BA	RX02 Floppy Diskette
AN	RK05 Disk Cartridge	BB	1600 BPI Magtape
AP	800 BPI Magtape	BC	RL02 Disk Cartridge
AR	TU60 Cassette	BE	TU58 Dectape

Unique Identifier AC-8169A-MC

The unique identifier will be alphanumeric.

Revision Identifier AC-8169A-MC

The revision identifier will be a single alpha character and will be changed each time the component is revised.

License Identifier AC-8169A-MC

This single identifier indicates whether the software is restricted or non-restricted, and whether or not a license is required.

- D Diagnostic Software, license required
- M Diagnostic Software, no license required
- Y Diagnostic Software, restricted distribution

CPU Identifier AC-8169A-MC

This single character will indicate the central processor unit on which the software is used.

- A PDP-8
- C PDP-11
- E VAX
- J PDP-9/15/XVM
- K Cross Product Line
- N PDP-14
- P PDP-12
- 1-9 Patch Level

HOW TO USE DIAGNOSTIC GRID

The ordering part number is made up of three distinct parts:

- 1) Class Code 2) Unique Identifier 3) Variant

Example:

For purposes of eliminating redundancy and to promote the ease of using the diagnostic grid, we have listed the class code and variant at the top of each column and listed only the Unique Identifier which changed for each line.

Example: Doc. Part #
 AC **MC**

To order the document for CFKAAC0, 11/34 Basic Inst. Test, order part # AC-8041C-MC

CFKAAC0 8041C

Document	Part	#	AC-8041C-MC
RX01	"	"	AS-9643P-MC
RX02	"	"	BA-F033K-MC
RK05	"	"	AN-E754R-MC
RL01	"	"	AX-E441U-MC
TU58	"	"	*THIS DIAGNOSTIC IS NOT AVAILABLE ON TU58 MEDIA

800 BPI MAGTAPE
 AP-9708Z-MC

		Document						800 BPI
		Part #	RX01	RX02	RK05	RL01	TU58	Magtape

New Literature From Digital

Finally! A single reference source of selected Digital hardware and software documentation products. This new directory makes necessary product information readily accessible and it can be used to determine what documentation products are required to support a particular hardware or software option.

The Directory contains:

SOFTWARE DOCUMENTATION PRODUCTS

- Software Documentation Kits
- Source Microfiche Kits
- Software Manuals, Handbooks, Reference Cards

HARDWARE DOCUMENTATION PRODUCTS

- Hardware Manuals
- Maintenance Prints
- Diagnostic Kits

OTHER FEATURES

- Ordering/Pricing Information
- Accessories & Supplies Group Discount Policy
- System Software Organization
- Understanding Digital's Software Numbering Scheme
- Glossary of Software Terms and Abbreviations
- Documentation Index by Ordering Part Number
- Documentation Index by Description

- Do you always have the necessary documentation at your fingertips?
- Do you know which Digital Engineering changes are applicable to your system?

If you can't answer 'yes' to both of these questions, Digital's Maintenance Documentation Service (MDS) can help.

MDS provides almost all service documentation on microfiche: maintenance manuals, illustrated parts breakdowns, diagnostic listings, diagnostic change orders, diagnostic patch orders, wire lists, Field Change Orders (FCO's), Preventive Maintenance (PM) procedures, and a wealth of other useful information.

- Are you always up-to-date with the latest hardware changes? If not, DEC-O-LOG may be the answer!

DEC-O-LOG is a valuable notification service. A subscription to DEC-O-LOG provides essential information for all Digital customers who maintain their own systems. DEC-O-LOG is a summary of Field Change Orders (FCO's) and Engineering Change Orders (ECO's) for your system's CPU's, peripheral options, subassemblies and modules.

To obtain a copy of any of the above literature fill in and cut out the coupon on the opposite page.

Clip and mail to:

Digital Equipment Corporation
Attn: Circulation Dept. RQ/W83
460 Amherst Street
Nashua, NH 03063

For more information about the products or services described on the opposite page, check the appropriate box(es) below.
