CM9043 Enhanced Display

Full Compatibility With IBM EGA Card or Equivalent

• The EGA (Enhanced Graphics Adapter) card is the industry standard for high performance business graphics, and features downward compatibility for use with older software supporting the Color Graphics Adapter (CGA) system.

17% Larger Screen than Standard 12" Monitors • 14" tube (13" visual) provides larger screen size without an appreciably larger footprint.

64 Color Capability In Enhanced Graphics Mode • The EGA system provides a full 64 color palette to display your best graphics work.

16 Color Capability In Color Graphics Mode • The CM9043 is fully compatible with the software and hardware base which supports the Color Graphics standard.

640 Dots of Resolution (horizontal) • This monitor will display 640 dots horizontally, allowing 80 characters of text to be accurately displayed.

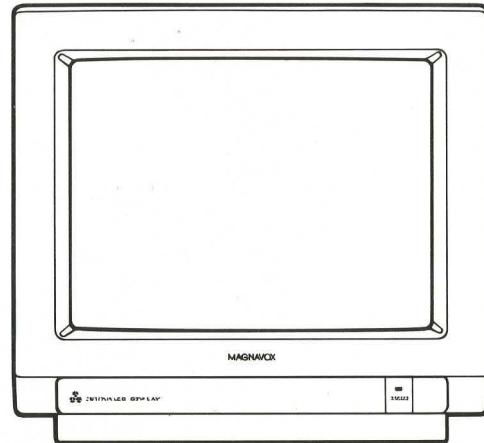

Up To 350 Lines Resolution (vertical, Enhanced mode) • This level of resolution provides solid graphics images and high quality text character formats.

Text Mode Display Function In Green or Amber • For text-intensive applications, you may switch the monitor into a green-only or amber-only display mode, emulating the appearance of a monochrome monitor.

Vertical and Horizontal Centering Controls • Allows for adjustment of both size and position of images displayed on the CRT, assuring compatibility with most enhanced graphics adapter cards.

Interface Cable Included • This monitor comes equipped with a cable for Enhanced Graphics adapter (EGA) cards.

One Year Limited Warranty • This Magnavox computer monitor is covered by a one-year limited warranty on parts and labor.
