

# SunOS Release 4.1.1 Publications Roadmap

## Roadmap to SunOS™ Release 4.1.1 Documentation

This roadmap charts a suggested route through SunOS 4.1.1 documentation. As with any SunOS release, your starting point should be the *Read This First* packed in the software media box that contains your release tape or CD-ROM. The *Read This First* provides valuable information that is too recent to have been included in the manuals themselves.

The next document you should read is the *SunOS 4.1.1 Release Manual*. It contains “Notes of Special Importance” before installing or using SunOS 4.1.1, descriptions of new hardware and software features, and a chapter on “Known Problems”.

After the *Read This First* and the *SunOS 4.1.1 Release Manual*, feel free to take the routes indicated or go “off-road” and make your own path. Documents are listed below in (roughly) the order they appear on the map. Aside from the *Read This First*, all the documents come with the SunOS 4.1.1 docubox. Manuals that are packaged together are listed together.

- *Read This First*
  
- **Binder: SunOS Release and Install**
  - SunOS 4.1.1 Release Manual*
  - Installing the SunOS*
  - Quick Install Guide*
