

Your Job Just Got Easier.

Now there's a revolutionary new office product that gives you all the benefits of powerful word processing, including automatic letter writing and virtually unlimited document storage—just by plugging into your Olympia electronic typewriter.

The simple-to-use SYSTEL II makes typing, correcting, and proofing easier than ever—without having to buy or learn to use an expensive, complicated word processor. Simply plug the SYSTEL II into your Olympia electronic typewriter, and you're all set.

Here's How It Works:

The SYSTEL II sits on your desk next to your electronic typewriter. You type as usual, but the letters go onto the display screen, instead of the paper. You can then work with the text in a variety of ways that just aren't possible with a typewriter alone.

For example, you can insert or delete letters, words, punctuation, or paragraphs. Correct errors. Restructure paragraphs. Or change one word throughout an entire document by just changing it once. All without retyping. The SYSTEL II will also hyphenate automatically, and move words down to the next line if new words are added. It automatically combines names and addresses with text for automatic letter writing. There's even an option that checks your spelling.

The results? Error-free documents printed out on your typewriter just as they appear on the screen, on your own forms and letterhead, at your command.

And whenever you need it, the typewriter works by itself at the flip of a switch.

Here's What It Costs:

Word processing capability like this usually starts at over \$7000. But SYSTEL delivers the same kind of capability for less than half that—under \$3500. What's more, you won't have to replace your present equipment. So you save both ways. The unit can even be unplugged and moved from typewriter to typewriter, saving time for other people in the office when you're not keeping it busy.

To see the amazing SYSTEL II and try it for yourself, call your local office machine dealer. Or call SYSTEL at 800 538-8444, ext. 111. Within California call 800 672-1464, ext. 111.

If you're going to make your job easier and more productive, what are you waiting for?

SYSTEL II

Features:

- Economical price (suggested retail under \$3500).
- Uses Olympia electronic office typewriters for typing words/data and printing them out in final form.
- Provides virtually unlimited document storage (typically over thirty pages per disk).
- Can be easily unplugged and moved from one typewriter to another.
- The typewriter still works as a typewriter when needed.
- Complete user training materials included. Training available through your office machine dealer.
- Easy to learn and use, the unit will:
 - Insert and delete words, paragraphs, characters and punctuation.
 - Automatically re-form paragraphs to wider or narrower margins.
 - Change a word throughout the document by changing it only once.
 - Manipulate text without retyping.
 - Do automatic letter writing.
- Optional programming:
 - Automatic spelling checking.
- Operating aids for the user include:
 - On-screen prompting and instruction for easier use.
 - Total document access, no need to be concerned about length of document.
 - Word wrap capability provides automatic carriage return for easier and faster typing.
 - Selectable justification (even when changes are made).
 - Automatic hyphenation when word is split at end of line.
 - Automatic column alignment (including decimal tabs).
- Printing enhancements such as:
 - Boldface and doublestrike (on certain typewriter models).
 - Underlining.
 - Strikeouts (i.e., for use in legal documents).
 - Subscript and superscript.
- Attractive, contemporary design including adjustable, non-glare screen for comfortable viewing.
- Reliable, modular design for maintenance-free operation.
