RT–11

Master Index

Order No. AA-H380A-TC

March 1980

The *RT-11 Master Index* is a cumulative index with references to all of the manuals in the RT-11 operating system documentation set.

RT-11

Master Index

Order No. AA-H380A-TC

SUPERSESSION/UPDATE INFORMATION: This is a new manual

OPERATING SYSTEM AND VERSION: RT-11 V4.0

How To Use This Book

The RT-11 Master Index is a cumulative index with references to all of the manuals in the RT-11 operating system documentation set. This index helps you find which manual contains the primary discussion of a specific topic, and where else in the documentation set you may find information on that topic.

The master index does not include references to the BASIC-11, FORTRAN IV, TECO, or KED manuals, since they are not considered part of the RT-11 operating system.

Entry Format

For each entry, the title of each book that contains information about the topic precedes the chapter and page references that indicate where the information can be found. The following manual title abbreviations are used to identify the documents referenced in the master index:

Manual Title Abbreviations

Code	Title
DOC	RT-11 Documentation Directory
INT	Introduction to RT-11
MES	RT-11 System Message Manual
REF	RT-11 Programmer's Reference Manual
GEN	RT-11 Installation and System Generation Guide
SUG	RT-11 System User's Guide
SSM	RT-11 Software Support Manual
MAC	PDP-11 MACRO-11 Language Reference Manual

Underlined page numbers are primary references. A primary reference is the main source of information about an item within the entire documentation set; it is the reference treatment of a topic as opposed to the introductory treatment of the same topic.

The following sample entry illustrates the format of the index:

BASIC keyboard command, INT: 10-2, SUG: 4-22

This entry indicates that a discussion of the BASIC keyboard command occurs in the Introduction to RT-11 on page 10-2 and in the RT-11 System User's Guide on page 4-22, the latter being the primary reference for the topic.

The RT-11 Master Index includes entries that appear in each manual's individual index, as well as entries for the RT-11 System Release Notes, RT-11 Documentation Directory and RT-11 System Message Manual, although none of these three manuals contains its own index.
