

MICROCOMPUTER DIGEST

ANNUAL INDEX

VOLUME 2

JULY, 1975 TO JUNE, 1976

Microcomputer Associates Inc.

APPLICATIONS

- July 1975*
Electronic Warfare—Part II, p5
- September 1975*
Electronic Warfare—Part III, p5
Microcomputer Education, p6
- CONFERENCES:**
- August 1975*
8080 vs 6800, p13
PL/M Programming Course, p13
Swiss Hands-On uC Course, p13
- September 1975*
Micros Micros—WESCON Theme, p6
- October 1975*
WESCON—Micro Wrap Up, p5
ICS Conducts Philips Course, p16
Practical System Design Course, p17
- November 1975*
COMPCON 76 Spring Tutorial, p13
Micro and Mini Systems, p13
- December 1975*
MOS Technology 6502/6530 Courses, p12
COMPCON 76 Spring, p13
Mini/Micro Computer Conference, p13
- January 1976*
ACS Microprocessor Short Course, p2
Three-Day uC Workshops, p10
uP and LSI in Telecommunications, p10
One Day Microcomputer Course, p10
Mostek F8 Seminar Series, p10
COMPCON Spring 76, p16
ELECTRO/76, p16
Software Engineering Conference, p10
- February 1976*
One Day Microcomputer Course, p14
- March 1976*
Compdesign/76, p9
Putca, p9
Mini/Micro Computer Conference, p9
- April 1976*
Personal Computing 76, p15
Memory System Design Seminar, p15
Micro-Mini Interfacing, p15
- May 1976*
Micro and Mini Systems, p12
Microcomputer Workshop, p13
- June 1976*
Mostek Begins Second F8 Tour, p9

DEVELOPMENT SYSTEMS:

- July 1975*
5065 Development System Announced, p10
8080 Emulation Instrument, p11
- August 1975*
Microcomputer Development Systems, p4
8- & 16-Bit uC Development System, p8
uC Education System, p8
PPS-4 Development System, p9
MicroPac 80/A, p10
- September 1975*
8080 In Circuit Emulator, p1
FPLA Programmer Now Available, p11
- October 1975*
Microcomputer Development Series, p1
Industrial Altair 8800, p9
uC For Education & System Development, p11
MicroPac PROM Programmer, p15
- November 1975*
WDC Adds uC Development Systems, p5
Low Cost PROM Programmer, p11
- December 1975*
Extra 80, p5
Altair 680 Announced, p6
In-Circuit Microcomputer Analyzer, p7
- February 1976*
2650 Software Development System, p5
ADC Microcomputer, p9

April 1976

- Microcomputer Development Terminal, p5
Hardware/Software Development, p6
Microcomputer Development System, p9
NEC Introduces PDA-80, p10

May 1976

- IM-6100 uC Development System, p1

June 1976

- Program Development Station, p4
F-8 Development System, p5

FINANCIAL:

- July 1975*
MicroPac 80 Price Reduced, p11
Xerox 800 Purchase Available, p12
Intel Cuts 2102, p13
Philips Completes Signetics Purchase, p17
Preliminary Merger Talks, p18
1980 Foreign uC Market to Exceed U.S., p18

August 1975

- AMI 6800 Starter Kit, p7
- September 1975*
Intersil Drops uP Prices, p7
Digital Controls In Process Industry, p17

October 1975

- \$297 Mostek F-8 Kit, p8
11.3% Growth for 1976, p20
British Computer Sales Up, p21

November 1975

- Intel Lowers 8080 Prices, p6

December 1975

- DEC Orders 50,000 8080's, p4
NEC Drops uPD8080 Prices, p4
New CDP 1801 Prices, p4
Prices Lowered, p8

January 1976

- Lower Price Nets Big Deal, p2
National, A&P Enter Agreement, p18
Word Processing Market, p18

February 1976

- Mostek Lowers F8 Prices, p5
- March 1976*
\$8 Million uC Terminal Contract, p15
8080 uP Sales to Hit \$30M, p15
U.S. Computer Printer Market, p15
NSC Lands Two POS Sales, p15
FC&I Quarterly Cash Dividend, p16
Process Control Equipment Study, p16

April 1976

- EPTAK Sales Pass 525 Units, p19
Intel Lands \$1M 8080 Order, p19
Tariff Regulation Repeal Urged, p20

May 1976

- Mostek Lowers F8 Prices, p6
2640 Short-term Lease, p7
84% uC Buyers Satisfied, p19
AMI Foresees 48% uP Growth, p20
Worldwide Semi Shipments, p20
Explosive Terminal Growth, p20
- June 1976*
NSC Expands Hinky POS Sales, p12
Semi Shipments Pegged at \$5B, p12
Siemens Predicts European Sales, p12

LITERATURE REVIEWS:

- July 1975*
A Look at Trends in Microprocessor/Microcomputer Software Systems, p15
Programmable Controllers: The Tractors of the Computer Industry, Part 1 & 2, p15
The Microprocessor Handbook, p15
- August 1975*
Beware of the Errors that Can Creep into uP Benchmark Programs, p14
Floating-Point Computation, p14
Making the Most of your Micro, p14
- September 1975*
How to Pick a Microprocessor, or a Mini or Anything in Between, p14

- Microcomputers: Fundamentals & Applications, p14
Microprocessors, p14

October 1975

- Basic uP Test Tool: The Portable Debugger, p18
Design Your Own Microcomputer by Using Bipolar/LSI Processor Slices, p18
European Industrial Robots, p18
Using a Microprocessor: A Real-Life Application—Part I, p18

- When to Use Higher-Level Languages in Microcomputer-Based Systems, p18

November 1975

- Mating Microprocessors with Converters, p14
Microprocessor Impact Series, Volume I—Analytical Instruments, p14

December 1975

- 2½ Generation uP's—\$10 Parts that Perform Like Low-End Mini's, p14
An Introduction to Microcomputers, p14
Microprocessors Simplify Industrial Control Systems, p14
European Microprocessors, p15
Hobbyist Interchange Tape System, p15
uP Simplifies Design of Flexible Specialized Test Equipment, p15

- Operator's Console Considerations in Microprocessor System Design, p15
SCAMP Microprocessor Aims to Replace Mechanical Logic, p15

March 1976

- Multi-Level Nesting of Subroutines in a One Level Microprocessor, p11
Enter the 16,384-Bit RAM, p11
How DEBUG Software Can Make a uP Breadboard Intelligent, p11

April 1976

- Microprocessors in Testingland—The Jury Receives its Instructions, p16
Displays Don't Trouble 8-Bit uP's, p16

May 1976

- Microprocessors and Microcomputers, p15
Assembly Level Programming for Small Computers, p16
Introduction to Microcomputers & Microprocessors, Volume II, p16
EDN Microprocessor Design Series, Volume II, p16

MARKETING:

- July 1975*
Zentec Signs \$1 Million Agreement, p17

MEMORIES:

- July 1975*
National Announces 1702A Replacement, p12
MM2101 Enters Volume Production, p13
High-Speed 16K N-Channel ROM, p13

September 1975

- Fairchild Shipping 4K RAMs, p11
Low Cost CMOS Static RAM, p11
New 1K Schottky RAM, p12

October 1975

- AMI Drops 6605 RAM, p14
Intersil Adds Two 4K PROMs, p14
Intersil Introduces 4K RAM, p14
M6800 Floppy Disc System, p14
National Sampling 4K RAM, p14
IMP-16 & PACE Core Memories, p15

November 1975

- 8K RAM, p11

December 1975

- 8K RAM Due in '76, p10

January 1976

- 16-Pin 4K RAM in Full Production, p8
2K Static RAM, p9
3542 RAM Available, p9
RAMs Enter Volume Production, p9
PROM Chart, p15

February 1976

- Hi-Performance 4K RAM, p13
AMD Introduces 4K RAMs, p13
MOS Equivalents of Bipolar 1K RAMs, p14

March 1976

- AMD Introduces Static 4K RAM, p8

April 1976

- Mechanical PROM, p11
Harris Enters Memory Market, p12
1702A Replacement, p13

May 1976

- NEC Offering Three RAM Families, p9
Microcomputer Core Memory, p9
uC Stand-Alone Core Memory, p9
CMOS Memory Battery, p11

June 1976

- Assembler Linking Loader, p6
Intel Macro Cross Assemblers, p6
Microcomputer Software: 8008/8080 Cross Assembler, p6
6800, F8, 2650 Soft Support, p6
8080 Cross Products for IBM 360, p6
1 Megabyte OEM Memory, p7
Signetics Offering 4K RAM Board, p7
Keyboard Programmable RAM, p8

MICROCOMPUTERS:*July 1975*

- 16-Bit Mil Spec Microcomputer, p8
MMI-300 GP Microcomputer, p11

August 1975

- Mostek Introduces GEMS-8, p1
2nd Generation Microcomputer, p10
Process Control Microcomputer, p10

September 1975

- The JOLT from MAI, p1
GI IM1600 Now Available, p7
Cramer to Offer uC Kits, p8
Pro-Log Supporting M6800 & F8, p10

October 1975

- 4-Bit uC Less than \$100, p8
Modular Microcomputer Kit, p8
NCR Uses Custom uP in New Terminals, p8
New MMI Division Offers 3 Systems, p8
General Automation Unwraps uC Family, p10

November 1975

- SWTPC M6800 Computer System Kit, p7
Weatherford Offering Micro-68, p7
\$275 4-Bit Microcomputer Kit, p6

December 1975

- 8080A-Based CPU Board, p8

January 1976

- Desk Top Microcomputer Kit, p1
Micro Based Time Share System, p2
Comptrol Industrial Microcomputer, p3
EM&M 8080 Compatible Bipolar System, p3
SMS System 40 Microcomputer, p3
4-Bit Modularized Micro, p3
\$90 4-Bit Microcomputer Kit, p3
MYCRO-1 System, p4
Process Control Microcomputer, p4
8-Bit Microcomputer, p5

February 1976

- Rockwell PPS-8 Assembler, p1
OEM Microcomputer System Cards, p3
Intel Single Board Computer, p4
Wince Microcomputer, p6
Disc-Based Microcomputer, p6
8080 Microcomputer Card, p8
Modular uC Interfaces to PDP-11, p9
4-Bit General Purpose Computer, p9

March 1976

- Single Card Microcomputer, p1
KIM-1, A Full System-Nova Kit, p1
Zilog to Introduce Z-80, p2
Microcomputer Trainer, p3
F-8 Based CRT Educator, p3
The Servant 8, p4
Rugged Microcomputers, p4
Heurikon OEM uC Board, p5

April 1976

National Announces \$99 SC/MP Kit, p1
Fully Assembled Design Kit, p6
IM6100 Microcomputer Kit, p7
M6800 SBC Family, p7
uP Learning Module, p9
6800 Floppy System, p10
Cramer Offering \$1,000 uC Kits, p12

May 1976

16-Bit Nova Microprocessor, p1
Ruggedized Microcomputer, p5
Single Board OEM Computer, p5
New Series of 8080 uC's, p7

June 1976

COSMAC Microcomputer, p2
Single Board 2650 Computer, p2
AMI 6800 Prototyping Card, p4
6502 uC With Keyboard and Display, p4
Mini Micro Designer, p4
TI Offering uP Learning Module, p4
Information Control's 8080 uC, p5
Monitor Debug Module, p5
Microcomputer Building Blocks, p5

MICROCOMPUTER-BASED PRODUCTS:*July 1975*

DEC to Expand Line with PDP-11/03, p8
uC Lean Burn Tester, p8
uC Repeating Station Draws 5 W, p8
Computer Graphic Output Plotter, p9
Restaurant & Bar uC POS Terminal, p9
Instrument to Use LSI-11, p10
uP Increases Gas Mileage 40%, p10

August 1975

uC Capacitance Bridge, p9
uC Signal Generator, p9
uC Teaching Instrument, p9

September 1975

4-Bit Educational Microcomputer, p8
uC Spectrum Analyzer, p8
Microcomputer Serial Printer, p9
New Version of Model 340 Terminal, p9
Upgradable POS System, p9
Intelligent Floppy Disc, p10
uC-Controlled Wiring Analyzer, p10

October 1975

IBM Enters Microcomputer Market, p1
DEC Unveils Under \$10K Disc System, p7
IMP Used in Global Navigation System, p7
Computer Terminal Monitor, p9
High-Speed Bare Circuit Board Tester, p9
Ma Kettle Should See This!, p9
uC Keyboard Printer Terminal, p9
New Twist in Sewing Machines, p9
8080 Data Entry System, p10
Electronic Crane Uses Micro, p10
Microcomputer-Controlled Keypunch, p10
uC in Measurement Subsystems, p10
Programmable Logic Controller, p10
Data Logger Family Introduced, p11
PLAN Gets Smart, p11
PPS-Based Spectrophotometer, p11

November 1975

IBM 5100 Architecture, p1
IMSAI Hypercube, p5
Economic Programmable Controller, p7
uC Communication Controller, p7
Telephone Measuring Device, p7
Bristol UCS 3000 Uses 8080, p8
Dana's uC Timer & Counter, p8
uC Controls Telescope in Chile, p8
uC Data & Timing Generator, p8
Sears to Offer uC Game, p8
16-Bit Brilliant Bee, p9
BM Yields 6800 Acquisition System, p9
Plotter Controller, p9

December 1975

uC Aids in Law Enforcement, p3
First CP-1600 Product Unveiled, p5
First Processor to Use 16K RAM Chips, p5
Microcomputer Printer/Plotter, p6
Xerox Introduces Two uC Systems, p8

January 1976

Intelligent Voting, p4
uC Controller Compatible with Minis, p4
Smart Valve!, p4
Terminal Offers Improved Capabilities, p4
8008 Cardiac Computer, p5
B&FI 8080 Logger, p5
IMP Controls Paint Mixer, p5
uC Drives Plasma Display, p5
uC Mates Printers to Computers, p5
Two ECMA-Compatible Terminals, p5
13 Pound Silent 700, p6

Ballantine Uses uC in Counter/Timer, p6
uC Source Data Entry System, p6
Programmable Tachometer, p6
Traffic Controllers, p6

February 1976

Multi-Microprocessor Network, p5
Source 700, p5
uC Intelligent Matrix Printers, p6
uCs Join U.S. Celebration, p7
uC Data & Timing Generator, p7
uC-Based Multiplexer, p7
Intelligent Data Processing Terminal, p7
Acquisition/Analysis/Control System, p8
TI Terminal Polling System, p8
Receive-Only Teleprinter, p8
8080-Based Memory Module, p9
Tenny Microcomputer Programmer, p10
Where She Stops, p10

March 1976

Microcomputer-Based Printers, p2
8080 Heart of Timet Terminal, p3
8080-Based In-Circuit Tester, p3

April 1976

Floppy Disc Controller Systems, p7
8008 Based Memory Module, p8
uC Controls Printer/Plotter, p8
GTE Introduces uC Telephone System, p8
uC Controlled D/A Systron System, p8
Sycor Matrix Printers Use uP, p8
uScope Programming System, p9

May 1976

Control uC Design System, p4
Smart Tape Cartridge System, p5
The Wand Has a Brain, p5
Remote Processors, p6
120 PS uC Terminal, p6
300 Bipolar uC Heart of Adam, p6
uC-Based Terminal, p7

June 1976

uC Floppy Disc Subsystem, p2

MICROCOMPUTER DISTRIBUTORS:*August 1975*

Hamilton Opens 16 uC Center, p12

September 1975

Wyle Gains Intel uC Franchise, p13

November 1975

Comstar to Market MICRAL uC, p12
Rockwell Holding Franchise Talks, p12

December 1975

Distributors to Stock TI SBP 0400, p4
Arrow to Stock uC Supplies, p12
Elmar Expands uC Center Capabilities, p12
Schweber Opens uC Design Center, p12

January 1976

Rockwell Appoints Distributors, p9

March 1976

EXORciser Added to uC Center, p10

April 1976

Single Chip ROM-CPU I/O, p1

May 1976

Wyle Adds Signetics Line, p13

MICROCOMPUTER LITERATURE:*July 1975*

ADL First uP Conference Text, p14
New Studies Trace uC & Semis, p14

August 1975

Course Materials Available, p14
Microprocessor Studies, p14
Micro-Scope Bulletin, p14

September 1975

Computer Printer Analysis, p13
European uC Study Available, p13
European Microprocessor Activities, p18

October 1975

Altair Users Group Newspaper, p17
Byte, p17
Electronics Book Series, p17
IEEE Repository Index, p17
European Microcomputer Usage, p21

November 1975

8080 Design Manual, p13
Computer Protocols, p13
Free JOLT Brochure, p13
ICE Brochure Available, p13
Intel Application Note, p13

January 1976

"An Introduction to Microcomputers," p17
Cramer Offering Dictionary, p17
"Microcomputer Dictionary & Guide," p17
Scelbi 8B User's Manual, p17
"Microprocessor Design & Application," p17

February 1976

Microprocessor Study, p16

March 1976

8080 Design Manual, p10
Available Documents, p11

April 1976

Introduction to Microprocessors, p16
Self-Teaching uC Software Course, p16

May 1976

Tiny Basic, p9
U.S. Low Cost Electronic Area, p14
Semi-Annual uC Reference, p14
Modern Data Survey, p15
Intro to uC and uP, p15
PACE-SC/MP Handbooks, p15

June 1976

Microcomputer Software, p9
8080 Reliability Report, p9
Handbook, p10
uC Testing Study, p10
New 2650 Appl. Notes, p10
Intel Spec., p10
New RCA Data Books, p10
Learning Timeshare BASIC, p10
Intelligent Terminal Report, p10
uP/uC Buyers Survey, p12

MICROCOMPUTER TESTING:*September 1975*

Microprocessor Test System, p12

November 1975

Microprocessor Tester Delayed, p12

March 1976

LSI CHIP & uP Tester, p8

April 1976

Memory & LSI Test System, p10
Benchtop Microprocessor Tester, p14

MICROPROCESSORS:*July 1975*

NEC Microcomputers, Inc., p1
New uP Executes PDP-8/E Instructions, p1
The \$9.98 Computer On-A-Chip, p1
UK Microprocessor Activity, p1
2650 Now Being Shipped and Sampled, p1
Second Source Hunt Continues, p7
TI to Offer Two Versions of 4-Bit uP, p7

August 1975

100 ns Bipolar Microprocessor, p1
\$15 Single Chip, 8-Bit uP, p1
3rd Generation Microprocessor, p1
2 Chip Version of PPS-4 Due, p6
8-Bit uP Withstands Auto Environment, p6
SMS Unbundles MicroController, p6

September 1975

16-Bit Panafacom Microprocessor, p1
Low Cost uP Enters Market, p1
Intel's Higher-Speed 8080 uP, p7
NEC to "Truly" Second Source 8080, p7
Rockwell Announces 2-Chip uP, p7

October 1975

CDP1800 uP Commercially Available, p1
LSI-11 Chips Open to the Public, p1
Rockwell & National uP 2nd Source Pact, p1
AMD Marketing 8080 Replacement, p7
Signetics Adds to Bipolar uC Line, p7
SOS uP Seen by Year End, p7
HP Designs Custom 16-Bit uC Chip, p8

November 1975

AMD & Motorola 2901 Pact, p1
Harris to Manufacture IM6100, p1
Rockwell & AEG Cross License Agreement, p1
TI's Single Chip 16-Bit uC, p1
NCR 2nd Sourcing 8080 In-House, p6

December 1975

AMD & Raytheon Sign 2900 Agreement, p1
GI and SEMI Enter Transfer Pact, p1
Miproc-16 Available on U.S. Market, p1
New Low-End 8-Bit Microprocessor, p1

January 1976

1600 to be Second Sourced, p1
U.S. & Japan 6800 Agreement, p1
Motorola & AMI Extend Agreement, p1

February 1976

Intel & Siemens 2nd Source Pact, p1
Fairchild & Olympia Sign F8 Agreement, p1
Two Single Chip Microprocessors, p1
National Introduces SC/MP, p3

March 1976

AMS & Signetics 2650 2nd Source Pact, p1
Sescosen to Manufacture 2900, p1

April 1976

One Chip COSMAC, p1
CDP 1802 Second Sourcing, p4
Toshiba 16-Bit CPU, p5
MMI Redesigning 6701, p5
English Appliance Microprocessor, p5
10 MHz 64-Instruction uP, p5

May 1976

Signetics/SMS 300 Pact, p1
Intel's PROM-RAM-I/O CPU, p1
Raytheon 2900 Ready Soon, p4
12-Lead to Microprocessor, p4
NEC Adds to 8080 Family, p4
Transitron Delays uP, p4
MOS Technology Drops 6501, p4

June 1976

Mostek to Second Source Z-80, p1
New Motorola-AMD Agreement, p1
SMS Redesigns MicroController, p1
8-Bit 9900 Coming, p2
GI Producing European 5-Chip uP, p2

PEOPLE, COMPANIES AND EVENTS:*July 1975*

Microcomputer Education, p6
Wyle Opens Technology Centers, p7
A/S Mycron Now Offering Mycro-1, p13
Homebrew Club Gains uC Expertise, p14
PCS Intros uC Workshop, p14
Microprocessor Design Course, p14

August 1975

British Firm Steps Up uC Efforts, p1
Fairchild Obtains Restraining Order, p7
Lincoln Semiconductor Opens, p12
Rockwell Reorganization, p12
Siemen's Computest Products Move, p12
Game Programs Wanted, p13

September 1975

SRI to Study Industrial uC, p13
Module Products Group Formed, p15

October 1975

FC&I to Purchase Xincor, p16
TI Expands European Effort, p16
Tymshare to Acquire Quelex Data, p17

November 1975

DEC Pondering 8080 Adoption, p6
 NCR & MEC Royalty Agreement, p10
 New uC Rental Firm, p12
 Processor Applications, Ltd., p12
 Puerto Rico Adds Incentives, p12

December 1975

Motorola Sues MOS Technology, p11
 National & Fairchild Settle Dispute, p11
 GI Files Suit Against Mostek, p12
 New Division Formed by FC&I, p12
 Mostek Expands 4K RAM Testing, p13

January 1976

Microcomputer Concepts, Inc., p7
 Microcomputer Design Centers, p10
 People on the Move, p16
 National Micro Van, p17

February 1976

OEM Memory Systems, p14
 GI Launches Suit Against Fairchild, p14
 Chesapeake Microcomputer Club, p14

March 1976

Mirco & Fairchild Agreement, p9
 1,000th LSI-11 Shipped, p10
 62 Pounds of LSI, p10
 Simulation Adds uC Department, p10

April 1976

RCA Moving 4K RAM Operation, p14

May 1976

Call for Papers, p13
 Intel Israel Ltd., p13

June 1976

Logical Acquires Creative Computer, p12

PERIPHERALS:*July 1975*

Pertec Introduces 2 Disc Drives, p12
 Two Products Added to MicroPac Line, p12
 uC Data Acquisition Modules, p12

August 1975

IMP Data Acquisition System, p11
 Intellec Analog Peripherals, p11
 Intellec Printer & Controller, p11
 Stand-Alone Printer, p11

September 1975

Flexible Disc System for MicroPac, p11
 uC Tape Storage System, p12

October 1975

\$110 Modem Kit, p15
 Data Acquisition Module, p15
 Support Boards for Altair, p15

November 1975

Floppy Disc System, p10
 Data Acquisition Module, p11
 Digital Position Indicators, p11
 IMP Interfaces, p11
 uC Power Supplies, p11
 Power Supplies for uC Systems, p12

December 1975

F-8 uP Hardware Kit, p9
 110 cps Printer with HP2640A Interface, p11

January 1976

Floppy Disc Controller, p8
 New Teletype Terminal, p8
 ROMULATOR, p8
 8080 Wire Wrappable Assembly, p9

February 1976

Compact Data Printer, p12

March 1976

Shugart Streaker, p7
 Controller/Computer Interface, p7
 Communication Mag Tape Peripheral, p8

April 1976

uProgrammed Floppy Disc Controller, p11
 Interdyne Cassette Formatter, p12
 Data Acquisition Module, p12
 Disc Controller, p13
 Dual Mag Tape uP Peripheral, p14

May 1976

IMP/PACE Data Acquisition System, p10
 Okidata Printer, p11
 Single Board Analog I/O System, p11
 Scan Data OCR System, p12
 uC Floppy System Kit, p12
 uC Analog I/O Coming, p12

June 1976

I/O Kit Mates Selectric to uC, p6
 Data Acquisition System, p6
 LSI-11 Interface & Logic Modules, p8
 Hardware Multiply/Divide, p8

SOFTWARE:*July 1975*

Software Support Increased, p13
 3780 Gains Fortran Compiler, p13

September 1975

6800 Relocatable Macroassembler, p11

October 1975

8080 One Pass Assembler, p12
 8080 Resident Assemblers, p12
 Cross-Assembler for Intel Line, p12
 Process Control Compiler, p12

Two-Pass Fortran Compiler, p12
 UCS & GE Add 6800 Capability, p12
 MIL-8080 Software, p13
 Mycro-Tek Offering Cross Assembler, p13

November 1975

6800 PL/M Cross-Compiler, p9
 JOLT Resident Assembler, p9
 8080 Cross Assembler, p10
 8080 Real-Time Executive Program, p10
 Altair Program Development Package, p10

December 1975

Intel Cuts Software Rates, p8
 uC Cross Assemblers for PDP-10's & 11's, p8
 8080 BASIC Language Interpreter, p9
 JOLT Mini Cross-Assembler, p9
 NCSS uC Software Support, p9
 Single Pass 8080 Assembler, p9

January 1976

6500 Macro Cross-Assembler, p7
 6800 High Level Language, p7
 8080 & 6800 Software, p7
 NSI Handling Mycro-Tek Products, p7
 RCA Support, p7

February 1976

F-8 Cross-Assembler, p10
 Intermetrics Develops M6800 PL/M, p10
 8080 Assembler/Simulator, p10
 UCC Supporting Popular uPs, p11
 NEC Timeshare Network, p11
 8080 Resident Assembler, p11
 uC Line of Cross-Assemblers, p11

March 1976

Resident SBC 80/10 Software, p5
 uC Macro-Assemblers & Simulators, p5
 Fortran Compiler, p6
 PACE Cross Assembler, p6

April 1976

Solie-Stack Oriented Language, p11
 Intel Cross-Assemblers, p11
 F8 Assembler/Simulator, p11

May 1976

Microcomputer Concepts, p7
 2900 Higher Level Language, p7
 Relocatable Assembler/Loader, p8
 Resident POS MMI 8080 Compiler, p8
 8080 SDIC Resident Assembler, p8
 Control Data Offering Software, p9

SUPPORT CHIPS:*September 1975*

Timer, Counter & Generator, p12

October 1975

Floppy Disc Controller Chip, p13
 MOS Tech 6530 Peripheral Driver, p13
 CCD Analog Shift Register, p14
 D/A Converter Specifically for uC, p15

November 1975

Clock Generator, p10

December 1975

Intersil's New CMOS Timing Circuits, p10
 Time Division Multiplexer, p10
 CMOS A/D Converters, p11
 Quad Bus Transceiver, p11

January 1976

High Speed A/D Converter, p9

February 1976

uC Interface for Wang 600/700, p8
 PROM Programmer Kit, p11
 Floppy Disc System, p11
 Wire-Wrap uP Socket Board, p11
 Microcomputer Power Supply, p12
 New LSI Bus Transceiver, p12
 uC Support Circuits, p12
 Low Cost Data Acquisition System, p13

March 1976

8080 Emulator, p4
 Programmable MCS-40 Support Circuit, p6
 uC Wire Wrapping Panels, p7
 PROM Eraser, p7
 Militarized PROM Programmer, p7
 PROM Copier/Reader/Verifier, p7
 Micro I/O Support Chip, p8
 Logic Probe, p9

April 1976

Bipolar uP Support Chips, p12
 Dixel 68-6800 Emulator, p13
 LSI-11 Bus Converter, p13
 Dual/Triple uC Supplies, p14
 Open Framed uC Power Supplies, p14

May 1976

Universal PROM Programmer, p9
 2900 Microprogram Sequencer, p10
 8080 Support Chips, p10
 Data I/O Calibrator, p11
 HP Digital Logic Probes, p11

June 1976

Replaces 8080 Circuit, p7
 Lambda Enters uC Market, p8
 8 uC OEM Power Supplies, p8
 5V/12V Micro Supply, p8

SHEPARDSON MICROSYSTEMS

Microprocessor based product development using our own PACE, IMP 16, 6800 and 6502 development systems.
 10601 De Anza Blvd., Suite 302, Cupertino, CA 95014
 (408) 257-2996

LJM ASSOCIATES

Custom hardware and software development for
 INTEL 8080, 4040, 4004
 6331 Glade Ave., Suite 318 (213) 347-2695
 Woodland Hills, CA 91364

HEXADECIMAL CALCULATOR

8 digits, credit balance-complement, pocket size, leather case:
 \$35.95

OCTAL CALCULATOR

6 digits, credit balance-complement, pocket size, leather case:
 \$14.95

Money Back Guarantee

Prepaid orders sent postpaid. COD's plus postage. Rated firms invoiced plus postage. Literature free. Radix Precision, Box 13861-D
 Atlanta, GA 30347

WOODLEY ASSOCIATES

Custom hardware and software development for
 INTEL 8080, ZILOG Z-80
 (In-house development equipment)
 604 Indian Home Road (415) 837-3992
 Danville, California 94526

ATLANTA COMPUTER MART

IMSAI Dealer

Computer Kits, Accessories, Supplies, Books,
 5091-B Buford Highway, Atlanta, GA 30340

Software Consultant — Intel 8080 Specialist L. John Postas (408) 244-3381.
